Index of Authors

Numerals follwed by the letter A refer to Abstracts of Communication read at Meetings for Original Communications of the Nutrition Society

Aaron JI *see* Drummond S, 2A.

Abely M, Dallet P & Desjeux JF *Effect of cholera toxin on glutamine metabolism and transport in rabbit ileum*, 70A.

Adediji O & Suttle NF *Influence of diet type, potassium and animal species on the absorption of magnesium by ruminants*, 31A.

Aghakhan-Moheb M, Geissler CA & Lancer K *Effect of ephedrine, caffeine, and aspirin combinations on weight loss in obese women*, 15A.

Aherne A *see* Rogers PJ, 19A.

Ah-Sing E *see* Fereday AC, 32A.

Ah-Sing E *see* Slevin KA, 21A.

Ajami A *see* Young VR, 15.

Alfos S *see* Pallet V, 95A.

Al-Kudsi AM & Millward DJ *Diet and gallstones in Saudi Women*, 45A.

Allison SP *see* Lobo DN, 114A.

Allsopp AJ *see* Bilzon JLJ, 60A.

Allsopp AJ *see* Vincent C, 60A.

Allwood MC & Martin H *The stability of vitamin E in parenteral nutrition (PN) mixtures during administration*, 136A.

Al-Othman AM, Belton NR & Kirk TR *Iron intake in young children in relation to body weight and energy intake*, 41A.

Alquier C *see* Salvini S, 100A.

Al-Shagrawi RA *see* Iqbal SS, 27A.

Amaee B *see* Long S, 16A.

Amaee B *see* Long S, 16A.

Anderson AS, Bell A & Callander R *The impact of nutrition education intervention to increase fruit and vegetable consumption in an area of urban deprivation*, 8A.

Anderson AS *see* Eley S, 49A.

Anderson DH *see* Hutchings MR, 157A.

Andersson H *see* Arnaud MJ, 77A.

Andrews JF & McBennett SM *Thermoneutral temperature of Aston strain* ob/ob *mice acclimated to warm (30°) v. cold (20°) environments*, 76A.

Andrews JF *see* McBennett SM, 68A.

Andrews JF *see* McBennett SM, 68A.

Andrews JF *see* McBennett SM, 92A.

Antipatis C, Grant G, Hoggard N & Ashworth CJ *Effects of vitamin A deficiency during pregnancy on reproductive outcome and plasma vitamin E and leptin concentrations in the rat*, 58A.

Antoine JM *see* Rychen G, 99A.

Appleby PN *see* Key TJ, 271.

Archer C *see* Jamieson CP, 113A.

Arendt J *see* Ribeiro D, 34A.

Armstrong A *see* Booth DA, 6A.

Arnaud MJ, Normén L & Andersson H *Magnesium and calcium absorption from a sulfate-rich natural mineral water in ileostomy subjects*, 77A.

Arnaud M *see* Hercberg S, 85A.

Arner P *Microdialysis: use in human exercise studies*, 913.

Arnold K, O'Riordan S, Clark L & Parnell D *One years experience of a multidisciplinary percutaneous endoscopic gastrostomy (PEG) clinic*, 116A.

Arsenos G & Kyriazakis I *The effect of nitrogen form on the diet selection of sheep which have been deprived of protein in different ways*, 158A.

Arthur JR *Functional indicators of iodine and selenium status*, 507.

Aruoma OI *see* Beatty ER, 44A.

Ashton T, Jackson SK, Young IS, Davies B, Jones E, Peters JR & Rowlands CC *Biological applications of electron paramagnetic resonance spectroscopy: methods and limitations*, 171A.

Ashworth CJ *see* Antipatis C, 58A.

Asset G, Bauge E, Wolff RL, Fruchart J-C & Dallongeville J *Effects of pine seed oil on hypercholesterolemic transgenic mice*, 77A.

Astier C *see* Malpuech-Brugere C, 90A.

Atkinson EA *see* Rogers PJ, 19A.

Badruddin SH *see* Hakeem R, 154A.

Badruddin SH *see* Hakeem R, 155A.

Badruddin SH *see* Hakeem R, 156A.

Baildam AD *see* Harvie MN, 133A.

Baines M, Hartley M & Shenkin A *Lack of effectiveness of short-term intravenous nutrition (IVN) in restoring plasma antioxidant status post surgery*, 130A.

Ball D, Leiper JB & Maughan RJ *The effect of drink composition on deuterium accumulation in able-bodied and spinal-cord-injured men*, 168A.

Bambang *see* Kauldhar P, 58A.

Bangsbo J *Vasoactive substances in the interstitium of contracting skeletal muscle examined by microdialysis*, 925.

Bannerman E, Reilly JJ, Maclennan WJ, Kirk T & Pender F *Over 75s' annual health assessments: an opportunity to identify individuals 'at-risk' of under-nutrition?*, 131A.

Bannerman E, Pendlebury J, Phillips F & Ghosh S *Health-related quality of life and nutritional outcomes after percutaneous endoscopic gastrostomy (PEG): A prospective study*, 127A.

Bannerman E, Pendlebury J, Phillips F & Ghosh S *A cross-sectional study of nutritional outcomes after percutaneous endoscopic gastrostomy (PEG): results and problems of assessment*, 141A.

Bannister PA *see* Samra JS, 164A.

Barbé F *see* Chango A, 76A.

Barber MC *see* Salter AM, 29A.

Barber MC *see* Vernon RG, 541.

Barber MD, Fearon KCH & Ross JA *Dietary supplementation with eicosapentaenoic acid shows human pancreatic cancer growth in SCID mice*, 123A.

Barber MD, Fearon KCH & Ross JA *Dietary eicosapentaenoic acid modulates the immune system in Balb/c mice*, 135A.

Barber MD, Ross JA & Fearon KCH *The metabolic response to feeding in weight-losing patients with advanced pancreatic cancer*, 123A.

Bardocz S *see* Hughes EL, 41A.

Barker ME *see* Belderson PE, 6A.

Barlet J-P *see* Picherit C, 96A.

Barlow R, Duncan DG, Jenkins J & Hood K *Development and validation of nutritional risk assessment for routine use in an acute hospital Trust*, 119A.

Barnett J *see* Thompson RL, 46A.

Barnham J *see* Murphy MC, 5A.

Barrett J *see* Kirk SFL, 11A.

Barton R *see* Moynihan P, 38A.

Bates CJ *An appreciation – Thomas Moore*, 751.

Bates CJ & Tsuchiya H *Collagen crosslink ratios in bone and urine of guinea-pigs fed with graded intakes of vitamin C*, 63A.

Bates CJ *see* Walmsley CM, 5A.
Bauchart D *see* Gruffat D, 105A.
Bauchart D *see* Piot C, 106A.
Bauge E *see* Asset G, 77A.
Bautista J *see* Corraze G, 103A.
Baxter JP *Problems of nutritional assessment in the acute setting*, 39.
Baxter JP, Tait JM & Pennington CR *Continuous audit of percutaneous endoscopic gastrostomy for long-term enteral nutrition*, 143A.
Baxter JP *see* Beattie AH, 112A.
Bayle D *see* Mazur A, 91A.
Beath SV, Daly A, Clark S, Kelly DA, Buckels JAC, Mayer AD & De Ville Degoyet J *Monitoring changes in allograft function after small bowel transplantation in children*, 117A.
Beattie AH, Baxter JP, Prach AT & Pennington CR *An evaluation of the use of enteral nutritional supplements post operatively in malnourished surgical patients*, 112A.
Beatty ER, England TG, Geissler CA, Aruoma OI & Halliwell B *Effects of antioxidant vitamin supplementation on markers of DNA damage and plasma antioxidants*, 44A.
Beck MA *Selenium and host defence towards viruses*, 707.
Beckley D *see* Lund EK, 14A.
Belderson PE, Wood FE & Barker ME *Food choice in older adults: the role of information*, 6A.
Bell A *see* Anderson AS, 8A.
Belleville-Nabet F *see* Palupi NS, 95A.
Belton EA *see* Scott L, 145A.
Belton NR *see* Al-Othman AM, 41A.
Belton NR *see* Ruxton CHS, 99A.
Belton NR *see* Ruxton CHS, 155A.
Benamouzig R *see* Gaudichon C, 82A.
Benamouzig R *see* Ledoux N, 89A.
Bender DA *Optimum nutrition: thiamin, biotin and pantothenate*, 427.
Bennett AJ *see* Sims HM, 28A.
Bennoson J, Humayun MA, Jones AE, Hounslow A & Wootton SA *Within-individual variability in the gastrointestinal handling and metabolism of [1,1,1-^{13}C]tripalmitin*, 25A.
Bennoson J *see* Humayun MA, 35A.
Benzie IFF *Vitamin C: prospective functional markers for defining optimal nutritional status*, 469.
Berger R *see* Roef M, 165A.
Bergeron R *see* Kjaer M, 172A.
Bergmann C *see* Duranton B, 72A.
Besson C *see* Moriceau S, 94A.
Bethune K *see* Murray S, 113A.
Beylot M *see* Rigalleau V, 73A.
Beysen C & Fielding BA *Comparison of human plasma, erythrocyte and adipose tissue fatty acid compositions and their use as biomarkers of habitual dietary fatty acid intake*, 28A.
Biehler A *see* Vlaming S, 119A.
Bila C *see* Lecerf JM, 88A.
Billett MA *see* Sims HM, 28A.
Bilzon JLJ, Scarpello EG, Pethybridge RJ, Allsopp AJ & Wootton SA *Influence of an electrolyte beverage on short-term rehydration following a prolonged field exercise*, 60A.
Bilzon JLJ *see* Vincent C, 60A.
Bingham K *see* Casey A, 162A.
Bingham S *see* Hughes R, 43A.
Bingham SA *High-meat diets and cancer risk*, 243.
Bishop JA *see* Catterick J, 37A.
Bishop JA *see* Marriott LD, 117A.
Bishop JA *see* New SA, 10A.
Bishop JA *see* Prideaux L-A, 64A.
Bjarnason K *see* Lobo DN, 114A.
Björkstén B *Environment and infant immunity*, 729.
Blache D, Gesquière L, Loreau N & Durand P *Oxidant stress: the role of nutrients in cell–lipoprotein interactions*, 559.
Blackwell S *see* Drake R, 48A.
Blades M *Perception of supplementary sip feeds given to patients by nursing assistants working in a variety of settings in Northamptonshire*, 140A.
Blanchart G *see* Lucas F, 90A.
Blundell J *see* Fleming M, 19A.
Blundell J *see* Stubbs RJ, 151A.
Blundell JE & Cooling J *High-fat and low-fat (behavioural) phenotypes: biology or environment?*, 773.
Bocquier F *see* Bonnet M, 108A.
Bocquier F *see* Delavaud C, 108A.
Bocquier F *see* Faulconnier Y, 109A.
Bodey S *see* Burden ST, 120A.
Boehler N *see* Combettes-Souverain M, 79A.
Boesch C, Décombaz J, Slotboom J & Kreis R *Observation of intramyocellular lipids by means of ^{1}H magnetic resonance spectroscopy*, 841.
Boisson F *see* Chango A, 76A.
Bolton M *see* Campbell IT, 134A.
Bolton-Smith C *see* Wrieden WL, 39A.
Bong JJ, Kite P, Dobbins BM, Wilcox MH & McMahon MJ *The relative importance of endoluminal and extraluminal colonization in the pathogenesis of catheter related sepsis in the central venous catheter*, 118A.
Bonham MP *see* Rock E, 71A.
Bonilla S *see* Noel-Suberville C, 73A.
Bonneau M *see* Gondret F, 84A.
Bonnet M, Faulconnier Y, Leroux C, Bocquier F, Martin P & Chilliard Y *Effect of refeeding on two mRNA species of lipoprotein lipase in adipose tissue and cardiac muscle of sheep*, 108A.
Bonnet M *see* Faulconnier Y, 109A.
Booth DA, Rowe KR & Armstrong A *Food choice event frequencies predictive of individual fat intake: towards a self-assessment tool*, 6A.
Botham RL *see* Lund EK, 14A.
Bouchier-Hayes DJ *see* O'Flaherty L, 831.
Boujard T *see* Gelineau A, 83A.
Bourras M *see* Ledoux N, 89A.
Boussouel N *see* Bouttefroy A, 93A.
Boutellier U *see* Huber H, 166A.
Boutellier U *see* Zehnder M, 163A.
Bouttefroy A, Boussouel N, Revol-Junelles A-M & Milliere J-B *Optimization of anti-*Listeria monocytogenes *combinations of bacteriocins (nisin, curvaticin 13) and lactoperoxidase system in broth and milk*, 93A.
Bowers V *see* Lumbers M, 148A.
Bowling TE *see* Ng DHL, 116A.
Bracquart P *see* Perrin C, 96A.
Bradburn YJ *see* Burden ST, 120A.
Brookes SJ *see* Campbell IT, 134A.
Bruhat A, Jousse C & Fafournoux P *Amino acid limitation regulates gene expression*, 625.
Bruins MJ, Soeters PB & Deutz NEP *Increased* in vivo *liver nitric oxide production during endotoxin challenge in pigs*, 167A.
Bruunsgaard H *see* Pedersen BK, 733.
Buchli R *see* Zehnder M, 163A.
Buckels JAC *see* Beath SV, 117A.
Bülow J *see* Green S, 175A.
Bülow J *see* Kjaer M, 172A.
Bülow J *see* Langberg H, 173A.
Bülow J *see* Lange KHW, 175A.
Bülow J *see* Simonsen L, 173A.
Burden ST, Bodey S, Bradburn YJ, England F, Murdoch S, Thompson AL, Sim JM & Sowerbutts AM *Validation of a nutritional screening tool: testing the reliability and validity*, 120A.
Burgess L, Hackett A, Kirby S, Maxwell S & Nathan I *A reassessment of the contribution of meat to the intake of fat by children*, 40A.
Butler T *see* Moynihan P, 38A .
Butterwick R *see* Irvine AJ, 21A.
Buttery PJ *see* Salter AM, 29A.

Byrne DG, Mathias PM, Mulvaney M & Male-Kawuma M *The effect of nutritional supplementation on weight and clinical management of patients with human immunodeficiency virus (HIV) infection in rural Uganda*, 154A.

Cabral R, Formal M, Montagne L, Toullec R & Lalles J-P *Duodenal passage of a-conglycinin from soyabean in the preruminant calf*, 78A.
Cade JE *see* Greenhalgh A, 45A.
Cade JE *see* Kirk SFL, 11A.
Cade JE *see* Upmeier H, 10A.
Calder PC & Yaqoob P *The level of protein in the diet of pregnant rats affects lymphocyte proliferation and natural killer cell activity in the offspring at weaning*, 124A.
Calder PC *see* Donnellan CE, 25A.
Calder PC *see* Miles EA, 27A.
Calder PC *see* Wallace FA, 26A.
Calder PC *see* Yaqoob P, 26A.
Calder PC *see* Yaqoob P, 129A.
Calder PC *see* Yaqoob P, 136A.
Callander R *see* Anderson AS, 8A.
Callow J, Summers LKM & Frayn KN *Effect of meals of differing composition on postprandial fatty acid composition of LDL*, 33A.
Calvert C *see* Upmeier H, 10A.
Campbell DI, Lunn PG, Umar L & Elia M *Age related changes in intestinal permeability in a rural West African population*, 125A.
Campbell IT, Khan A, Bolton M, Nightingale P, Columb MO & Brookes SJ *The use of multiple frequency bioimpedance to assess fluid balance in critical illness*, 134A.
Campbell IT *see* Fraser D, 128A.
Campbell IT *see* Harvie MN, 133A.
Campbell IT *see* Reid C, 125A.
Cardew J, Hignett J & Seal C *Effect of healthy-eating advice and consumption of reduced-fat 'ready meals' on nutrient intake in healthy free-living volunteers*, 152A.
Casey A, Mann R, Bingham K, Fox J, Morris PG, Macdonald IA & Greenhaff PL *Quantitation of human liver and muscle volume and glycogen concentration during exercise and recovery*, 162A.
Cashman KD & Flynn A *Optimal nutrition: calcium, magnesium and phosphorus*, 477.
Cassidy A & Griffin B *Phyto-oestrogens: a potential role in the prevention of CHD?*, 193.
Catling T *see* Varden J, 138A.
Catterick J, Bishop JA, Ruggles CL, Siggers LS & New SA *Dietary intake and lifestyle patterns amongst Surrey teenage girls: preliminary findings*, 37A.
Catterick J *see* New SA, 10A.
Cettolo V *see* Francescato M, 161A.
Chabert M, Le Roux B & Louis-Sylvestre J *Compared with olfactory and gustatory stimuli, visual stimuli are operative cues for the estimation by healthy young men of the nutritional composition of all kinds of biscuits*, 78A.
Chabrot J *see* Chilliard Y, 70A.
Chambers A *see* Murphy MC, 5A.
Chambon P *see* Mark M, 609.
Champ M *see* Noah L, 94A.
Chandra RK *Nutrition and immunology: from the clinic to cellular biology and back again*, 681.
Chango A, Droesch S, Pfister M, Boisson F, Barbé F, Pariset M, Nuel G, Frémont S, Rosenblatt DS & Nicolas JP *The effect of the 677C->T mutation on plasma homocysteine and 5,10-methylenetetrahydrofolate reductase (MTHFR) thermolability in healthy volunteers*, 76A.
Chapman C *see* Minihane AM, 34A.
Charbonnier M *see* Salvini S, 100A.
Chardigny JM *see* Chilliard Y, 70A.
Chattopadhyay S *see* Vlaming S, 119A.
Chevassus-Au-Louis B *see* Mambrini M, 91A.
Chilima DM & Ismail SJ *The relationship between nutritional status and functional ability among older people in rural Malawi*, 4A.
Chilliard Y, Chardigny JM, Chabrot J, Ollier A, Sebedio JL & Doreau M *Effects of ruminal or postruminal fish oil supply on conjugated linoleic acid (CLA) content of bovine milk fat*, 70A.
Chilliard Y *see* Bonnet M, 108A.
Chilliard Y *see* Delavaud C, 108A.
Chilliard Y *see* Faulconnier Y, 109A.
Chopra M & Thurnham DI *Antioxidants and lipoprotein metabolism*, 663.

Index of Subjects

Numerals followed by the letter A refer to Abstracts of Communication read at Meetings for Original Communications of the Nutrition Society

[^{13}C]glucose enrichment
Measurement of [U-^{13}C]glucose enrichment by GC combusion (GC-C-) isotope ratio mass spectrometry (IRMS). Precision and reproducibility of laboratory standards and biological samples. **58,** 165A, 1999

^{2}H-labelled water
Quantifying the contribution of gluconeogenesis to glucose production in fasted human subjects using stable isotopes. **58,** 963, 1999

Acetate
Correction factors for ^{13}C-labelled substrate oxidation at whole-body and muscle level. **58,** 979, 1999

Acetate recovery factor
The effect of diet composition on acetate recovery factor during rest and exercise. 58, 163A, 1999

The effect of exercise intensity on breath $^{13}CO_2$ recovery during [1,2-^{13}C]acetate infusion. **58,** 166A, 1999

Adipocytes
Effects of fatty acids on proliferation and differentiation of cultured pig pre-adipocytes. **58,** 89A, 1999

Present and future studies on lipogenesis in animals and human subjects. **58,** 541, 1999

Adipose tissue
Macronutrient metabolism of adipose tissue at rest and during exercise: a methodological viewpoint. **58,** 877, 1999

Micordialysis: use in human exercise studies. **58,** 913, 1999

Impact of triacylglycerol structure on early metabolic events in adipose tissue. **58,** 23A, 1999

Early nutrition modulates adipose tissue development in neonatal pigs. **58,** 83A, 1999

Cross-population differences in Mauritian and French mothers' white adipose tissue (WAT) and milk and their influences on the erythrocyte phospholipid composition of their breastfed infants. **58,** 97A, 1999

Does dietary macronutrient composition relate to adiposity in young children? **58,** 99A, 1999

Effects of dietary lipid source on membrane phospholipid composition and lipid mobilization in perirenal adipose tissue. **58,** 101A, 1999

Lipogenesis in isolated adipocytes from two subcutaneous adipose tissues in Large White and Meishan pigs. **58,** 106A, 1999

Comparison of adipocytes from subcutaneous and intramuscular adipose tissues in pigs. **58,** 107A, 1999

Effect of refeeding on two mRNA species of lipoprotein lipase in adipose tissue and cardiac muscle of sheep. **58,** 108A, 1999

Nutritional regulation of lipoprotein lipase activity in bovine adipose tissues and muscles. **58,** 109A, 1999

Evidence for glycerol uptake by subcutaneous adipose tissue. **58,** 164A, 1999

Regulation of non-esterified fatty acid release from human subcutaneous adipose tissue after an overnight fast. **58,** 171A, 1999

The effect of endurance training on subcutaneous adipose tissue lipolysis in elderly women. **58,** 175A, 1999

Arterialized plasma leptin concentrations and adipose tissue leptin production following oral and intravenous administration of a lipid emulsion. **58,** 172A, 1999

Adolescents
Relationships between dietary restraint, dietary iron intake and iron status in adolescent females. **58,** 151A, 1999

Adults
The influence of maternal nutrient restriction in early to mid-pregnancy on placental and fetal development in sheep. **58,** 283, 1999

Ageing
Immune response during disease and recovery in the elderly. **58,** 85, 1999

Micronutrients and ageing: intakes and requirements. **58,** 573, 1999

Nutrition and immunology: from the clinic to cellular biology and back again. **58,** 681, 1999

Nutrition and immunity in the elderly. **58,** 685, 1999

Vitamin E and infectious diseases in the aged. **58,** 697, 1999

Age related changes in intestinal permeability in a rural West African population. **58,** 125A, 1999

Production of tumour necrosis factor-α by blood mononuclear cells increases with age and with BMI in healthy women. **58,** 129A, 1999

The percentage of mononuclear cells expressing adhesion molecule-1 increases with age. **58,** 136A, 1999

AIDS
Nutrition and immune function in human immunodeficiency virus infection. **58,** 743, 1999

Air-displacement plethysmography
New techniques in nutritional assessment: body composition methods. **58,** 33, 1999

Alcohol
Acute effects of alcohol on postprandial lipid metabolism. **58,** 32A, 1999
Potentiation of postprandial lipaemia by ethanol. **58,** 122A, 1999

Allergy
Environment and infant immunity. **58,** 729, 1999
Adverse reactions to foods in asthmatic young children. **58,** 11A, 1999
Food specific immunoglobulin (IgG) levels and allergic outcome in preterm infants. **58,** 56A, 1999

Aluminium
The regulation of mineral absorption in the gastrointestinal tract. **58,** 147, 1999

Amino acids
Amino acid limitation regulates gene expression. **58,** 625, 1999
The effect of phenylalanine supplementation on food intake and self-rated appetite scores. **58,** 17A, 1999

Ammonia
High-meat diets and cancer risk **58,** 243, 1999

Anaemia
Animal- and plant-food-based diets and iron status: benefits and costs. **58,** 235, 1999

Animal models
Validity of animal models for the cholesterol-raising effects of coffee diterpenes in human subjects. **58,** 551, 1999

Animal products
China: the soyabean–pork dilemma **58,** 345, 1999

Anthropometry
Problems of nutritional assessment in the acute setting. **58,** 39, 1999
Comparison of fundamental bio-electrical impedance analysis and anthropometric methods for predicting magnetic resonance imaging estimates of lower limb muscle cross-sectional area. **58,** 134A, 1999
Performing some simple anthropometric measurements on residents in nursing homes: how practical is it? **58,** 143A, 1999

Antibodies
Specific food immunoglobulin G (IgG) antibody levels to ovalbumin in asthmatic and non-atopic young children and adults. **58,** 13A, 1999

Antioxidants
Effects of dietary antioxidants on the immune function of middle-aged adults. **58,** 79, 1999
The bioavailability of non-nutrient plant factors: dietary flavonoids and phyto-oestrogens. **58,** 139, 1999
A possible role for vitamin C in age-related cataract. **58,** 295, 1999
Dietary influences on chronic obstructive lung disease and asthma: a review of the epidemiological evidence. **58,** 309, 1999
Vitamins and lung cancer. **58,** 329, 1999
Vitamin C: prospective functional markers for defining optimal nutritional status. **58,** 469, 1999
Micronutrients and ageing: intakes and requirements. **58,** 573, 1999
Antioxidants and lipoprotein metabolism. **58,** 663, 1999
Free radicals in skin and muscle: damaging agents or signals for adaptation? **58,** 673, 1999
An overview of methods for assessment of free radical activity in biology. **58,** 1001, 1999
Methods to detect DNA damage by free radicals: relation to exercise. **58,** 1007, 1999
Determination of activity of antioxidants in human subjects. **58,** 1015, 1999
Age-related changes in various biochemical measurements of metabolites and antioxidant nutrients in female volunteers aged over 65 years. **58,** 5A, 1999
Relationship between smoking, antioxidant intake and status indices in older people. **58,** 5A, 1999
Effects of antioxidant vitamin supplementation on markers of DNA damage and plasma antioxidants. **58,** 44A, 1999
Lack of effectiveness of short-term intravenous nutrition (IVN) in restoring plasma antioxidant status post surgery. **58,** 130A, 1999

Apolipoproteins
The immunolocalization of apolipoprotein B-48 and B-100 in human tissues. **58,** 23A, 1999

Appetite
Treatment of obesity: theory into practice. **58,** 53, 1999
Eating habits and appetite control: a psychobiological perspective. **58,** 59, 1999
The effects of specific nutrients on the regulation of feeding behaviour in human subjects. **58,** 533, 1999
Effect of habitual dietary protein intake on appetite and satiety. **58,** 17A, 1999
The effect of phenylalanine supplementation on food intake and self-rated appetite scores. **58,** 17A, 1999
The effect of chewing nutritive and non-nutritive material (modified sham feeding model) on subsequent appetite sensations and food intake. **58,** 20A, 1999
The value of modified sham feeding as a model to study pre-absorptive changes in appetite sensations. **58,** 126A, 1999

Arginine
Immunonutrition and surgical practice. **58,** 831, 1999

Arterialization
Arterio–venous differences to study macronutrient metabolism: introduction and overview. **58,** 871, 1999

Arterio–venous differences
Arterio–venous differences to study macronutrient metabolism: introduction and overview. **58,** 871, 1999
Macronutrient metabolism of adipose tissue at rest and during exercise: a methodological viewpoint. **58,** 877, 1999
Tracers to investigate protein and amino acid metabolism in human subjects. **58,** 987, 1999

Ascorbic acid
Vitamin C: prospective functional markers for defining optimal nutritional status. **58,** 469, 1999

Asthma
Dietary influences on chronic obstructive lung disease and asthma: a review of the epidemiological evidence. **58**, 309, 1999

Adverse reactions to foods in asthmatic young children. **58**, 11A, 1999

Diet intervention (DI) in the treatment of asthma in young children. **58**, 12A, 1999

Impact of diet intervention on the growth of asthmatic children. **58**, 12A, 1999

Specific food immunoglobulin G (IgG) antibody levels to ovalbumin in asthmatic and non-atopic young children and adults. **58**, 13A, 1999

Atherosclerosis
The genetics of serum lipid responsiveness to dietary interventions. **58**, 171, 1999

Atopic disease
Prematurity, immune function and infant feeding practices. **58**, 75, 1999

Bacteriocins
Optimization of anti-*Listeria monocytogenes* combinations of bacteriocins (nisin, curvaticin 13) and lactoperoxidase system in broth and milk. **58**, 93A, 1999

Beef and dairy products
Targets and procedures for altering ruminant meat and milk lipids. **58**, 593, 1999

Bicarbonate
Correction factors for ^{13}C-labelled substrate oxidation at whole-body and muscle level. **58**, 979, 1999

Bile acid
Bile acid synthesis by neutral (cholesterol-7α-hydroxylase) or acidic pathway (sterol-27-hydroxylase) in hamsters sensitive or resistant to diet-induced cholelithiasis. **58**, 79A, 1999

Bioavailability
The bioavailability of non-nutrient plant factors: dietary flavonoids and phyto-oestrogens. **58**, 139, 1999

Bioavailability of carotenoids in human subjects. **58**, 155, 1999

Animal- and plant-food-based diets and iron status: benefits and costs. **58**, 235, 1999

Biochemical markers
Problems of nutritional assessment in the acute setting. **58**, 39, 1999

Bioelectrical-impedance techniques
New techniques in nutritional assessment: body composition methods. **58**, 33, 1999

Biomarkers
Optimal nutrition: vitamin E. **58**, 459, 1999

Biotin status
Optimum nutrition: thiamin, biotin and pantothenate. **58**, 427, 1999

Blood flow
Limb and skeletal muscle blood flow measurements at rest and during exercise in human subjects. **58**, 887, 1999

Micordialysis: use in human exercise studies. **58**, 913, 1999

Microdialysis of skeletal muscle at rest. **58**, 919, 1999

Estimation of rat muscle blood flow by microdialysis probes perfused with ethanol [^{14}C]ethanol and $^{3}H_2O$. **58**, 174A, 1999

Blood pressure
Optimal intakes of protein in the human diet. **58**, 403, 1999

Body composition
The effect of inactivity on dietary intake and energy homeostasis. **58**, 115, 1999

Whole-body plethysmography compared with hydrodensitometry for body composition analysis in children aged 8–12 years. **58**, 59A, 1999

Impact of a child-specific dual-energy X-ray absorptiometry analysis prototype on bone mineral content and body composition in children aged 8 to 12 years. **58**, 62A, 1999

Validity of tissue composition in leg sections obtained by dual-energy X-ray absorptiometry against magnetic resonance imaging as reference. **58**, 63A, 1999

Effects of feed restriction during fattening on muscle lipid traits in the rabbit. **58**, 84A, 1999

Comparison of adipocytes from subcutaneous and intramuscular adipose tissues in pigs. **58**, 107A, 1999

Variability in the composition of fat-free mass in children aged 8–12 years. **58**, 124A, 1999

The influence of sex on changes in body composition in advanced non-small-cell lung cancer (NSCLC) patients undergoing chemotherapy. **58**, 133A, 1999

Comparison of fundamental bio-electrical impedance analysis and anthropometric methods for predicting magnetic resonance imaging estimates of lower limb muscle cross-sectional area. **58**, 134A, 1999

The use of multiple frequency bioimpedance to assess fluid balance in critical illness. **58**, 134A, 1999

Body composition assessment
Problems of nutritional assessment in the acute setting. **58**, 39, 1999

Body-composition techniques
New techniques in nutritional assessment: body composition methods. **58**, 33, 1999

Body fat
Obesity: from molecules to man. **58**, 1, 1999

Body-volume techniques
New techniques in nutritional assessment: body composition methods. **58**, 33, 1999

Body-water measurement
New techniques in nutritional assessment: body composition methods. **58**, 33, 1999

Body weight
Effects of extreme environments on food intake in human subjects. **58**, 791, 1999

Longitudinal observations of weight change in inoperable lung cancer. **58**, 13A, 1999

Effect of graded levels of exercise on body weight, appetite and food intake in normal-weight women consuming their normal diet in their natural environment. **58**, 19A, 1999

Expectations of patients in weight management. **58**, 92A, 1999

The metabolic response to feeding in weight-losing patients with advanced pancreatic cancer. **58,** 123A, 1999

Energy content of abnormal losses from intensive care patients. **58,** 125A, 1999

An evaluation of estimating patients' weights as an accurate method when compared with actual weight. **58,** 144A, 1999

Effect of graded levels of exercise on body weight, appetite and food intake in normal-weight men consuming their normal diet in their natural environment. **58,** 151A, 1999

Body-weight loss

The pulmonary cachexia syndrome: aspects of energy balance. **58,** 321, 1999

Bone

Optimal intakes of protein in the human diet. **58,** 403, 1999

Impact of a child-specific dual-energy X-ray absorptiometry analysis prototype on bone mineral content and body composition in children aged 8 to 12 years. **58,** 62A, 1999

Nutrient intake in peri and early post-menopausal Scottish women: preliminary findings from a longitudinal study on bone health. **58,** 62A, 1999

Collagen crosslink ratios in bone and urine of guinea-pigs fed with graded intakes of vitamin C. **58,** 63A, 1999

Dietary intake and bone health in young adolescent females: a comparison between elite gymnasts and healthy age-matched controls. **58,** 64A, 1999

Nutrient intake and bone health in ballet dancers and healthy age-matched controls: preliminary findings from a longitudinal study on peak bone mass development in adolescent females. **58,** 64A, 1999

Food intake and bone mineral status of Beijing adolescent girls. **58,** 65A, 1999

Effects of genistein and daidzein on ovariectomy-induced bone loss in rats. **58,** 96A, 1999

Brown trout

Intake and feed efficiency of brown trout selected for growth. **58,** 91A, 1999

Butyrate

Oxidant stress: the role of nutrients in cell–lipoprotein interactions. **58,** 559, 1999

Cadmium

Metal ions as regulators of the conformation and function of the tumour suppressor protein p53: implications for carcinogenesis. **58,** 565, 1999

Cafestol and kahweol

Validity of animal models for the cholesterol-raising effects of coffee diterpenes in human subjects. **58,** 551, 1999

Calcium

Optimal nutrition: calcium, magnesium and phosphorus. **58,** 477, 1999

The calcium and phosphorus intakes of Shenyang women in the north-east of the People's Republic of China. **58,** 50A, 1999

Effect of calcium supplementation on plasma osteocalcin concentration of Gambian children. **58,** 61A, 1999

Measured calcium intakes of breast-fed rural Gambian infants aged 3 and 12 months. **58,** 61A, 1999

Magnesium and calcium absorption from a sulfate-rich natural mineral water in ileostomy subjects. **58,** 77A, 1999

Contribution of mineral waters to dietary calcium intake in the French SU.VI.MAX cohort. **58,** 85A, 1999

Family resemblance in calcium intakes in the Stanislas Cohort. **58,** 85A, 1999

Cancer

The bioavailability of non-nutrient plant factors: dietary flavonoids and phyto-oestrogens. **58,** 139, 1999

High-meat diets and cancer risk **58,** 243, 1999

Health benefits of a vegetarian diet. **58,** 271, 1999

Optimal nutrition: fibre and phytochemicals. **58,** 415, 1999

Outcomes of undernutrition in patients in the community with cancer or cardiovascular disease. **58,** 655, 1999

Longitudinal observations of weight change in inoperable lung cancer. **58,** 13A, 1999

Luminal short chain fatty acid concentration and apoptosis in colonic crypts from rats exposed to dimethyl hydrazine (DMH). **58,** 14A, 1999

Nutritional status at diagnosis in a national cohort of children with acute lymphoblastic leukaemia. **58,** 14A, 1999

Inhibition of mutagen formation by organosulfur compounds. **58,** 43A, 1999

Effects of changes in polyamine metabolism on DNA methylation during growth inhibition of human colonic cancer cells. **58,** 72A, 1999

Guar gum increases but dietary cholesterol suppresses intestinal tumourigenesis in the *Min* mouse. **58,** 72A, 1999

Dietary supplementation with eicosapentaenoic acid shows human pancreatic cancer growth in SCID mice. **58,** 123A, 1999

The metabolic response to feeding in weight-losing patients with advanced pancreatic cancer. **58,** 123A, 1999

The influence of sex on changes in body composition in advanced non-small-cell lung cancer (NSCLC) patients undergoing chemotherapy. **58,** 133A, 1999

Carbohydrate

Correction factors for ^{13}C-labelled substrate oxidation at whole-body and muscle level. **58,** 979, 1999

Effect of meal size and carbohydrate content on gastric emptying, energy intake and satiety in man. **58,** 16A, 1999

Physiological and psychological effects of fat and carbohydrate: influence on the rate of delivery. **58,** 18A, 1999

Insulin-like growth factor binding protein-1: a potential marker for carbohydrate intake? **58,** 45A, 1999

Postprandial porto-arterial kinetics of ^{15}N, amino nitrogen, glucose and galactose in the growing pig after ingestion of milk, yoghurt and sterilized yoghurt. **58,** 99A, 1999

Carcinogenesis

Metal ions as regulators of the conformation and function of the tumour suppressor protein p53: implications for carcinogenesis. **58,** 565, 1999

Cardiovascular disease
Strategies for altering population intakes of fats and fatty acids. **58**, 189, 1999
Outcomes of undernutrition in patients in the community with cancer or cardiovascular disease. **58**, 655, 1999

β-Carotene
Vitamins and lung cancer. **58**, 329, 1999
Optimal nutrition: vitamin A and the carotenoids. **58**, 449, 1999
Effects of carotenoids on human immune function. **58**, 713, 1999

Carotenoids
Bioavailability of carotenoids in human subjects. **58**, 155, 1999
Optimal nutrition: vitamin A and the carotenoids. **58**, 449, 1999
Effects of carotenoids on human immune function. **58**, 713, 1999
Carotenoid distribution in tissues of the laying hen depends on dietary supplementation. **58**, 30A, 1999

Cataract
A possible role for vitamin C in age-related cataract. **58**, 295, 1999

Catering
Vegetarian meals which are proposed in collective catering may contribute to the recommended dietary allowances. **58**, 88A, 1999

Catheters
The relative importance of endoluminal and extraluminal colonization in the pathogenesis of catheter related sepsis in the central venous catheter. **58**, 118A, 1999
Tunnelled central venous catheters: insertion best practised in radiology suite with screening facilities? **58**, 118A, 1999
Is the impact of a nutrition support team on catheter-related sepsis sustained in the long term? **58**, 139A, 1999

Cell culture
The technological treatment of bovine milk: influence on cell culture. **58**, 84A, 1999

Central obesity
Relationship between waist:hip ratio, waist circumference and postprandial insulin response in post-menopausal women. **58**, 22A, 1999

Cereal consumption
Alternative futures for world cereal and meat consumption. **58**, 219, 1999

Childhood
A reassessment of the contribution of meat to the intake of fat by children. **58**, 40A, 1999
The influence of diet on indicators of iron, copper and zinc status in children under 24 months: preliminary findings. **58**, 40A, 1999
Iron intake in young children in relation to body weight and energy intake. **58**, 41A, 1999
Adequacy of revised UK reference data for nutritional assessment of 7–8 year olds. **58**, 47A, 1999
Assessing nutritional knowledge in prepubescent children using 'draw and tell' methodology. **58**, 49A, 1999
Reproducibility of measurement of resting metabolic rate in boys and girls aged 6-11 years. **58**, 59A, 1999
Whole-body plethysmography compared with hydrodensitometry for body composition analysis in children aged 8–12 years. **58**, 59A, 1999
Effect of calcium supplementation on plasma osteocalcin concentration of Gambian children. **58**, 61A, 1999
Measured calcium intakes of breast-fed rural Gambian infants aged 3 and 12 months. **58**, 61A, 1999
Food habits and growth of children of Subsaharan African ancestry born to immigrant parents and French children. **58**, 98A, 1999
Energy prescribed and energy received during parenteral nutrition in children. **58**, 113A, 1999
Monitoring changes in allograft function after small bowel transplantation in children. **58**, 117A, 1999
The effect of oral glutamine supplementation on growth faltering in Gambian infants. **58**, 121A, 1999
Variability in the composition of fat-free mass in children aged 8–12 years. **58**, 124A, 1999
Foods perceived to be important for boys and girls in UK and in Pakistan. **58**, 155A, 1999
Starch and NSP are associated with higher micronutrient intakes in young children. **58**, 155A, 1999
Social class differences in foods eaten by a national sample of 4-year-old children in 1950. **58**, 156A, 1999
Socio-cultural determinants of children's food choice. **58**, 156A, 1999
Low cost but acceptable food budget standards for households with young children. **58**, 159A, 1999

Children
The nutritional value of plant-based diets in relation to human amino acid and protein requirements. **58**, 249, 1999

China
China: the soyabean–pork dilemma **58**, 345, 1999

Cholelithiasis
Bile acid synthesis by neutral (cholesterol-7α-hydroxylase) or acidic pathway (sterol-27-hydroxylase) in hamsters sensitive or resistant to diet-induced cholelithiasis. **58**, 79A, 1999

Cholesterol
The genetics of serum lipid responsiveness to dietary interventions. **58**, 171, 1999
Effect of dietary cholesterol on the expression of the microsomal triglyceride transfer protein gene. **58**, 28A, 1999
Early maternal dietary protein manipulation and adult offspring cholesterol metabolism. **58**, 53A, 1999
Effects of pine seed oil on hypercholesterolemic transgenic mice. **58**, 77A, 1999
The cholesterol-lowering effect of guar gum is accompanied by an increase of bile acid digestive pools and intestinal reabsorption. **58**, 94A, 1999
Cholesterol uptake and hydroxymethylglutaryl (HMG)-CoA reductase activity of Caco-2-cell-line clones. **58**, 100A, 1999

Chronic obstructive pulmonary disease
Nutrition and lung health. **58,** 303, 1999

Dietary influences on chronic obstructive lung disease and asthma: a review of the epidemiological evidence. **58,** 309, 1999

The pulmonary cachexia syndrome: aspects of energy balance. **58,** 321, 1999

Chylomicrons
"Chylomicron" composition following oral and intravenous administration of a lipid emulsion. **58,** 130A, 1999

Cirrhosis
Treatment with ornithine aspartate (Hepa-Merz) restores muscle protein synthesis responsiveness to feeding in patients with liver cirrhosis. **58,** 121A, 1999

Hand-grip strength in cirrhosis: Its relationship to nutritional status and severity of liver disease. **58,** 128A, 1999

Resting energy expenditure should be measured in patients with cirrhosis, not predicted. **58,** 133A, 1999

Coconut oil
Effects of dietary coconut oil on the hepatic synthesis of apolipoprotein B, microsomal triacylglycerol transfer protein and LDL-receptor in the preruminant calf. **58,** 105A, 1999

Coffee
Validity of animal models for the cholesterol-raising effects of coffee diterpenes in human subjects. **58,** 551, 1999

Cognitive function
Eating habits and appetite control: a psychobiological perspective. **58,** 59, 1999

Colo-rectal cancer
Meat and colo-rectal cancer. **58,** 261, 1999

Conditioned food aversion
Conditioned food aversions: principles and practices, with special reference to social facilitation. **58,** 813, 1999

Conjunctival-impression cytology test
The effect of vitamin A on epithelial integrity. **58,** 289, 1999

Copper
Considerations for determining 'optimal nutrition' for copper, zinc, manganese and molybdenum. **58,** 497, 1999

Copper supplementation in middle aged people decreased the susceptibility to peroxidation of erythrocytes. **58,** 71A, 1999

Coronary heart disease
Lipoprotein atherogenicity: an overview of current mechanisms. **58,** 163, 1999

Phyto-oestrogens: a potential role in the prevention of CHD? **58,** 193, 1999

Dietary carbohydrates and triacylglycerol metabolism. **58,** 201, 1999

Unsaturated fatty acids. **58,** 397, 1999

Micronutrient status and other risk factors for CHD in a working male population. **58,** 2A, 1999

Variability over 6 years in blood homocysteine concentration in an elderly population in Hertfordshire and relationship with heart disease. **58,** 3A, 1999

Cow's milk
Evaluation of the impact of food technology on the allergenicity of cow's milk proteins. **58,** 587, 1999

Coxsackievirus
Selenium and host defence towards viruses. **58,** 707, 1999

Creatine kinase
Creatine kinase reaction studied in human skeletal muscle at rest and during exercise by the saturation transfer method. **58,** 161A, 1999

Critically ill
Glutathione status in critically-ill patients: possibility of modulation by antioxidants. **58,** 677, 1999

Cultural differences
Determinants of food choice at home in families in UK and in Pakistan. **58,** 154A, 1999

Foods perceived to be important for boys and girls in UK and in Pakistan. **58,** 155A, 1999

Cystic fibrosis
Nutrition and lung health. **58,** 303, 1999

Plasma vitamin E and urate levels in cystic fibrosis liver disease. **58,** 135A, 1999

Cytokines
Dietary fat influences the production of Th1- but not Th2-derived cytokines. **58,** 26A, 1999

Role of cytokines in the decrease of food intake during human immunodeficiency virus (HIV) infection. **58,** 97A, 1999

Deuterium accumulation
The effect of drink composition on deuterium accumulation in able-bodied and spinal-cord-injured men. **58,** 168A, 1999

Developing countries
Meat production in developing countries. **58,** 371, 1999

Diabetes mellitus
Oxidative stress and vitamin E status in experimental diabetes. **58,** 81A, 1999

Diet and genetics
Optimal macronutrient balance. **58,** 421, 1999

Diet selection
Diet selection and animal state: an integrative framework. **58,** 765, 1999

Habitat selection according to the ability of animals to eat, digest and detoxify foods. **58,** 799, 1999

Conditioned food aversions: principles and practices, with special reference to social facilitation. **58,** 813, 1999

Dietary advice
Treatment of obesity: theory into practice. **58,** 53, 1999

A comparison of the effect of two types of healthy eating dietary advice on perceived quality of life in Scottish men. **58,** 2A, 1999

Dietary assessment
Within-subject reproducibility of dietary restraint questionnaires. **58,** 8A, 1999

Suitability and acceptability of a dietary interview-survey designed to identify barriers to food selection, by denture and non-denture wearers: a pilot study. **58,** 46A, 1999

The relative validity of practice nurse dietary assessment in general practice. **58,** 46A, 1999

Accuracy of estimates of energy intake using the multiple-pass 24 h recall method in young children and adult women: a doubly-labelled water study. **58,** 47A, 1999

Minimizing errors associated with coding 24 h dietary recalls for INTERMAP in the UK. **58,** 48A, 1999

Refinements used in accurate assessment of dietary fatty acid intake using a standard nutrient database. **58,** 48A, 1999

Evaluation of a bar-code system for nutrient analysis in dietary surveys. **58,** 49A, 1999

Evidence-based practice: its relevance to nutritional intervention programmes. **58,** 50A, 1999

Dietary carbohydrate

Dietary carbohydrates and triacylglycerol metabolism. **58,** 201, 1999

Optimal macronutrient balance. **58,** 421, 1999

Dietary fat

The genetics of serum lipid responsiveness to dietary interventions. **58,** 171, 1999

Unsaturated fatty acids. **58,** 397, 1999

Optimal macronutrient balance. **58,** 421, 1999

High-fat and low-fat (behavioural) phenotypes: biology or environment? **58,** 773, 1999

Dietary fat guidelines

Strategies for altering population intakes of fats and fatty acids. **58,** 189, 1999

Dietary fatty acids

Strategies for altering population intakes of fats and fatty acids. **58,** 189, 1999

Optimal macronutrient balance. **58,** 421, 1999

Dietary fibre

Variation in dietary fibre intake and bowel function in omnivores, vegetarians and vegans. **58,** 37A, 1999

Dietary intake

Malnutrition and dietary inadequacy among rural elderly Malays: simple indices to identify individuals at high risk. **58,** 4A, 1999

Measurements of energy density from lean and obese consumers' self-reported dietary intakes: variation and associations with other dietary components. **58,** 7A, 1999

Fruit, vegetable and fat consumption of people who believe their diet is healthy. **58,** 9A, 1999

Costs of an (un)healthy diet: analysis from the UK Women's Cohort Study. **58,** 10A, 1999

Characterizing dietary supplement use in women. **58,** 11A, 1999

Energy distribution and non-starch polysaccharide intake in vegans. **58,** 36A, 1999

Dietary intake and lifestyle patterns amongst Surrey teenage girls: preliminary findings. **58,** 37A, 1999

The food and nutrient intake of students before commencing university and during the first semester. **58,** 38A, 1999

Diet and gallstones in Saudi Women. **58,** 45A, 1999

Dietary intake and bone health in young adolescent females: a comparison between elite gymnasts and healthy age-matched controls. **58,** 64A, 1999

Expectations of patients in weight management. **58,** 92A, 1999

Does dietary macronutrient composition relate to adiposity in young children? **58,** 99A, 1999

Effect of dietary energy sources and rearing temperature on lipogenesis in rainbow trout. **58,** 103A, 1999

Postprandial lipaemia after isoenergetic 3 d high-carbohydrate and high-fat diets. **58,** 132A, 1999

Dietary intake of adults, with and without pressure sores, treated by community nursing staff. **58,** 140A, 1999

Dietary intervention

Diet intervention (DI) in the treatment of asthma in young children. **58,** 12A, 1999

Impact of diet intervention on the growth of asthmatic children. **58,** 12A, 1999

Dietary modifications

Influence of a reduced saturated fat and isoenergetic increase in carbohydrate intake on the insulin sensitivity of glucose disposal in middle-aged men. **58,** 21A, 1999

Influence of a reduced saturated fat and isoenergetic increase in carbohydrate intake on postprandial lipaemia in middle-aged men. **58,** 32A, 1999

Dietary obesity

Selectivity of fatty acids on lipid metabolism and gene expression. **58,** 633, 1999

Dietary patterns

Alternative futures for world cereal and meat consumption. **58,** 219, 1999

Dietary recommendations

Animal v. plant foods in human diets and health: is the historical record unequivocal? **58,** 211, 1999

Dietary restraint

Within-subject reproducibility of dietary restraint questionnaires. **58,** 8A, 1999

Dietary restraint and weight gain during pregnancy. **58,** 54A, 1999

Dietary surveys

Specific under-reporting of "non-meals" and desserts by subjects suspected of under-reporting energy intake. **58,** 102A, 1999

Dieting

Eating habits and appetite control: a psychobiological perspective. **58,** 59, 1999

Digestion

Gastric emptying profile of solids is delayed in absence of colon. **58,** 15A, 1999

In vitro digestibility of prickly pear protein. **58,** 86A, 1999

Caseinomacropeptide release in human jejenum during digestion of a concentrated casein meal. **58,** 89A, 1999

Bioavailability of starch, rate of glucose absorption and intestinal metabolism in pigs. **58,** 94A, 1999

Disease
Immune response during disease and recovery in the elderly. **58,** 85, 1999

DNA
Methods to detect DNA damage by free radicals: relation to exercise. **58,** 1007, 1999

Effects of antioxidant vitamin supplementation on markers of DNA damage and plasma antioxidants. **58,** 44A, 1999

Docosahexaenoic acid
Development of farmed fish: a nutritionally necessary alternative to meat. **58,** 377, 1999

Tissue-specific profiles of docosahexaenoic acid (DHA) in male chickens depends on the dietary provision. **58,** 30A, 1999

Doubly-labelled water
Childhood leukaemia: a model of pre-obesity. **58,** 277, 1999

Body composition, water turnover and energy turnover assessment with labelled water. **58,** 945, 1999

Dual-energy X-ray absorptiometry
Validity of tissue composition in leg sections obtained by dual-energy X-ray absorptiometry against magnetic resonance imaging as reference. **58,** 63A, 1999

Dual-sugar intestinal-permeability test
The effect of vitamin A on epithelial integrity. **58,** 289, 1999

Duodenum
Duodenal passage of α-conglycinin from soyabean in the preruminant calf. **58,** 78A, 1999

Dyslexia
Is developmental dyslexia a fatty acid deficiency syndrome? **58,** 42A, 1999

Eating behaviour
Food choice and intake: the human factor. **58,** 513, 1999

What are the major correlates of macronutrient selection in Western populations? **58,** 755, 1999

Eicosapentaenoic acid
Development of farmed fish: a nutritionally necessary alternative to meat. **58,** 377, 1999

Dietary supplementation with eicosapentaenoic acid shows human pancreatic cancer growth in SCID mice. **58,** 123A, 1999

Dietary eicosapentaenoic acid modulates the immune system in Balb/c mice. **58,** 135A, 1999

Elderly
The relationship between nutritional status and functional ability among older people in rural Malawi. **58,** 4A, 1999

Age-related changes in various biochemical measurements of metabolites and antioxidant nutrients in female volunteers aged over 65 years. **58,** 5A, 1999

Food choice in older adults: the role of information. **58,** 6A, 1999

Immune response during disease and recovery in the elderly. **58,** 85, 1999

Over 75s' annual health assessments: an opportunity to identify individuals 'at-risk' of under-nutrition? **58,** 131A, 1999

The prevalence of malnutrition in patients admitted to Care of the Elderly wards. **58,** 139A, 1999

Performing some simple anthropometric measurements on residents in nursing homes: how practical is it? **58,** 143A, 1999

Catering for elderly hospital patients: a study of food choice in hip-fracture patients and the selection of suitable foods for supplementation. **58,** 148A, 1999

The effect of endurance training on subcutaneous adipose tissue lipolysis in elderly women. **58,** 175A, 1999

Electron paramagnetic resonance spectroscopy
Biological applications of electron paramagnetic resonance spectroscopy: methods and limitations. **58,** 171A, 1999

Electron spin resonance techniques
An overview of methods for assessment of free radical activity in biology. **58,** 1001, 1999

Emergency food aid
Food aid in emergencies: a case for wheat? **58,** 355, 1999

Energy balance
Influence of intense physical activity on energy balance and body fatness. **58,** 99, 1999

The effect of inactivity on dietary intake and energy homeostasis. **58,** 115, 1999

The pulmonary cachexia syndrome: aspects of energy balance. **58,** 321, 1999

High-fat and low-fat (behavioural) phenotypes: biology or environment? **58,** 773, 1999

Effects of extreme environments on food intake in human subjects. **58,** 791, 1999

Body composition, water turnover and energy turnover assessment with labelled water. **58,** 945, 1999

The fatty acid composition of high fat diets affects energy intake and energy expenditure in laboratory rodents. **58,** 25A, 1999

Energy balance during post-partum amenorrhea among chronically malnourished women in rural Bangladesh. **58,** 75A, 1999

Energy balance in chronic haemodialysis. **58,** 128A, 1999

Energy density
Measurements of energy density from lean and obese consumers' self-reported dietary intakes: variation and associations with other dietary components. **58,** 7A, 1999

Energy expenditure
Obesity: from molecules to man. **58,** 1, 1999

Preparing for inactivity: how insectivorous bats deposit a fat store for hibernation. **58,** 123, 1999

Childhood leukaemia: a model of pre-obesity. **58,** 277, 1999

Influence of meal time and stress induced by mental load on postprandial energy expenditure. **58,** 87A, 1999

Resting energy expenditure should be measured in patients with cirrhosis, not predicted. **58,** 133A, 1999

Splanchnic thermogenesis during a hyperinsulinaemic euglycaemic clamp. **58,** 173A, 1999

Energy intake
Obesity: from molecules to man. **58,** 1, 1999

Body composition, water turnover and energy turnover assessment with labelled water. **58,** 945, 1999

Accuracy of estimates of energy intake using the multiple-pass 24 h recall method in young children and adult women: a doubly-labelled water study. **58,** 47A, 1999

Specific under-reporting of "non-meals" and desserts by subjects suspected of under-reporting energy intake. **58,** 102A, 1999

Energy metabolism
Introduction to in vivo ^{31}P magnetic resonance spectroscopy of (human) skeletal muscle. **58,** 861, 1999

Reduced efficacy of leptin on weight reduction in *ob/ob* mice when administered at thermoneutrality. **58,** 92A, 1999

Energy requirement
Body composition, water turnover and energy turnover assessment with labelled water. **58,** 945, 1999

Enteral nutrition
Audit of a home enteral feeding service against the British Association for Parenteral and Enteral Nutrition (BAPEN) standards. **58,** 114A, 1999

Complications experienced by patients on home enteral tube feeding in Dublin. **58,** 115A, 1999

Functional status of adult patients on home enteral tube feeding in Dublin. **58,** 115A, 1999

Growth of paediatric and adult home enteral tube feeding between 1986 and 1998 in the Cambridge health district. **58,** 127A, 1999

Circulating concentrations of vitamins D, C and thiamin in disabled patients on long-term enteral tube feeding. **58,** 129A, 1999

Outcome of home enteral tube feeding in adults, in the Cambridge health district, between 1986 and 1998. **58,** 131A, 1999

Continuous audit of percutaneous endoscopic gastrostomy for long-term enteral nutrition. **58,** 143A, 1999

Environment
Environment and infant immunity. **58,** 729, 1999

Epidemiology
Meat and colo-rectal cancer. **58,** 261, 1999

Clinical features of food allergy in France based on 703 patients (1116 cases of food allergy). **58,** 74A, 1999

Epidemiological study of food allergy in France. **58,** 75A, 1999

Erythrocytes
Copper supplementation in middle aged people decreased the susceptibility to peroxidation of erythrocytes. **58,** 71A, 1999

Erythrocyte pyruvate carboxylase
Optimum nutrition: thiamin, biotin and pantothenate. **58,** 427, 1999

Exercise
Influence of intense physical activity on energy balance and body fatness. **58,** 99, 1999

What processes are involved in the appetite response to moderate increases in exercise-induced energy expenditure? **58,** 107, 1999

Exercise and immune function: effect of ageing and nutrition. **58,** 733, 1999

Observation of intramyocellular lipids by means of ^{1}H magnetic resonance spectroscopy. **58,** 841, 1999

NMR of glycogen in exercise. **58,** 851, 1999

Introduction to in vivo ^{31}P magnetic resonance spectroscopy of (human) skeletal muscle. **58,** 861, 1999

Macronutrient metabolism of adipose tissue at rest and during exercise: a methodological viewpoint. **58,** 877, 1999

Limb and skeletal muscle blood flow measurements at rest and during exercise in human subjects. **58,** 887, 1999

Skeletal muscle substrate metabolism during exercise: methodological considerations. **58,** 899, 1999

Microdialysis: use in human exercise studies. **58,** 913, 1999

Vasoactive substances in the interstitium of contracting skeletal muscle examined by microdialysis. **58,** 925, 1999

Body composition, water turnover and energy turnover assessment with labelled water. **58,** 945, 1999

Use of stable isotopes to study carbohydrate and fat metabolism at the whole-body level. **58,** 953, 1999

Correction factors for ^{13}C-labelled substrate oxidation at whole-body and muscle level. **58,** 979, 1999

Tracers to investigate protein and amino acid metabolism in human subjects. **58,** 987, 1999

Methods to detect DNA damage by free radicals: relation to exercise. **58,** 1007, 1999

Analysis of cellular responses to free radicals: focus on exercise and skeletal muscle. **58,** 1025, 1999

Effect of graded levels of exercise on body weight, appetite and food intake in normal-weight women consuming their normal diet in their natural environment. **58,** 19A, 1999

Influence of an electrolyte beverage on short-term rehydration following a prolonged field exercise. **58,** 60A, 1999

The effect of a single exercise session on postprandial chylomicron, VLDL and total plasma triacylglycerol concentrations. **58,** 122A, 1999

Effect of graded levels of exercise on body weight, appetite and food intake in normal-weight men consuming their normal diet in their natural environment. **58,** 151A, 1999

Creatine kinase reaction studied in human skeletal muscle at rest and during exercise by the saturation transfer method. **58,** 161A, 1999

Quantitation of human liver and muscle volume and glycogen concentration during exercise and recovery. **58,** 162A, 1999

The effect of diet composition on acetate recovery factor during rest and exercise. **58,** 163A, 1999

Lactate production in response to glucose and triacylglycerol infusion at rest and during aerobic exercise in human subjects. **58,** 165A, 1999

Fat utilization during exercise at low and moderate intensity after a single fat- or carbohydrate-rich meal. **58,** 166A, 1999

The effect of exercise intensity on breath $^{13}CO_2$ recovery during [1,2-^{13}C]acetate infusion. **58,** 166A, 1999

Exercise in healthy adult dogs increases plasma thiobarbituric acid reactive substances (TBARS), an indicator of oxidative stress. **58,** 169A, 1999

Antipyrine as a marker for exercise-induced oxidative stress in untrained young adults. **58,** 170A, 1999

Determination of hydroxylated derivatives of antipyrine in plasma with HPLC-Tandem-Mass Spectrophotometry. **58,** 170A, 1999

Measurement of glucose production during exercise in human subjects: comparison of the arteriovenous balance and isotopic tracer methods. **58,** 172A, 1999

Family Expenditure Survey

A comparison between the National Food Survey (NFS) and the Family Expenditure Survey (FES) data. **58,** 152A, 1999

Farm animals

Effects of protected methionine in a fattening diet for culled cows and heifers. **58,** 81A, 1999

Fat composition

Impact of triacylglycerol structure on early metabolic events in adipose tissue. **58,** 23A, 1999

Fat intake

Influence of intense physical activity on energy balance and body fatness. **58,** 99, 1999

Food choice event frequencies predictive of individual fat intake: towards a self-assessment tool. **58,** 6A, 1999

Physiological and psychological effects of fat and carbohydrate: influence on the rate of delivery. **58,** 18A, 1999

The effects of high-fat and low-fat diets on mood, energy expenditure, neurohumoral function and blood lipids. **58,** 18A, 1999

The fatty acid composition of high fat diets affects energy intake and energy expenditure in laboratory rodents. **58,** 25A, 1999

Dietary fat influences the production of Th1- but not Th2-derived cytokines. **58,** 26A, 1999

Effects of fish oil, olive oil, butter oil and maize oil on insulin resistance after turpentine-induced inflammation in the rat. **58,** 27A, 1999

Comparison of human plasma, erythrocyte and adipose tissue fatty acid compositions and their use as biomarkers of habitual dietary fatty acid intake. **58,** 28A, 1999

Postprandial lipaemic responses to hydrogenated soyabean oil and native soyabean oil in healthy volunteers. **58,** 33A, 1999

A reassessment of the contribution of meat to the intake of fat by children. **58,** 40A, 1999

Refinements used in accurate assessment of dietary fatty acid intake using a standard nutrient database. **58,** 48A, 1999

Perceptions of portion weights of different shapes of chips. **58,** 150A, 1999

Fat metabolism

Impact of endogenous ^{13}C-labelling of a foodstuff on $^{13}CO_2$ output during stable-isotope studies of postprandial fat metabolism. **58,** 71A, 1999

Fat utilization during exercise at low and moderate intensity after a single fat- or carbohydrate-rich meal. **58,** 166A, 1999

Fatty acids

Correction factors for ^{13}C-labelled substrate oxidation at whole-body and muscle level. **58,** 979, 1999

Mononuclear cell fatty acid composition in healthy subjects supplementing their diets with evening primrose oil or fish oil. **58,** 26A, 1999

Comparison of human plasma, erythrocyte and adipose tissue fatty acid compositions and their use as biomarkers of habitual dietary fatty acid intake. **58,** 28A, 1999

Tissue-specific profiles of docosahexaenoic acid (DHA) in male chickens depends on the dietary provision. **58,** 30A, 1999

Effect of dietary fatty acids on plasma and adipose tissue fatty acid proportions during pregnancy in the sow. **58,** 31A, 1999

Is developmental dyslexia a fatty acid deficiency syndrome? **58,** 42A, 1999

Effects of fatty acids on proliferation and differentiation of cultured pig pre-adipocytes. **58,** 89A, 1999

Effects of polyunsaturated fatty acids and peroxisome proliferators on stearoyl-CoA desaturase 1 gene expression in chicken hepatoma cells. **58,** 104A, 1999

Contribution of peroxisomes to fatty acid oxidation in tissues from preruminant calves: effects of the nature of dietary fatty acids. **58,** 106A, 1999

The metabolism of [^{13}C]-linoleic acid in healthy men and women. **58,** 167A, 1999

Fatty acid composition

Manipulating meat quality and composition. **58,** 363, 1999

Feed selection

Grazing trade-offs between forage intake and faecal avoidance in sheep: the effect of sward height, parasitic status and level of feeding motivation. **58,** 157A, 1999

Species composition of sheep diets when grazing grass/clover swards: the effect of parasitic status and level of feeding motivation. **58,** 157A, 1999

The effect of nitrogen form on the diet selection of sheep which have been deprived of protein in different ways. **58,** 158A, 1999

Feeding behaviour

The effect of nutrients on feed intake in ruminants. **58,** 523, 1999

Diet selection and animal state: an integrative framework. **58,** 765, 1999

Assuaging nutritional complexity: a geometrical approach. **58,** 779, 1999

Fetal development

Metabolic differentiation of the bovine heart muscle during fetal development. **58,** 86A, 1999

Fetal growth

The long-term consequences of intra-uterine protein malnutrition for glucose metabolism. **58,** 615, 1999

Fetal nutrition

15-Hydroxy-prostaglandin dehydrogenase activity is altered in a rat model of the fetal origins of adult hypertension. **58,** 51A, 1999

Impairment of fetal kidney development induced by maternal protein restriction in the rat. **58,** 51A, 1999

Influence of maternal vitamin C intake on collagen concentration during fetal development in the guinea-pig. **58,** 54A, 1999

Fetal programming
The impact of dietary protein restriction on insulin secretion and action. **58,** 647, 1999

Fetus
The influence of maternal nutrient restriction in early to mid-pregnancy on placental and fetal development in sheep. **58,** 283, 1999

Fibre
Fibrolytic activities in caecal and colonic microbial ecosystems in ponies: effect of the presentation of the forage. **58,** 80A, 1999

Fick Principle
Arterio–venous differences to study macronutrient metabolism: introduction and overview. **58,** 871, 1999

Fish oil
Development of farmed fish: a nutritionally necessary alternative to meat. **58,** 377, 1999

The effect of marine fish oil supplementation on insulin sensitivity in the dog. **58,** 21A, 1999

Effects of fish oil supplementation on *in vitro* oxidation of LDL in subjects with an atherogenic lipoprotein phenotype. **58,** 24A, 1999

Mononuclear cell fatty acid composition in healthy subjects supplementing their diets with evening primrose oil or fish oil. **58,** 26A, 1999

Dietary fish oil reduces the expression and function of the LDL scavenger receptor in mice. **58,** 27A, 1999

Effects of ruminal or postruminal fish oil supply on conjugated linoleic acid (CLA) content of bovine milk fat. **58,** 70A, 1999

Microencapsulation of marine oils for use in food fortification. **58,** 103A, 1999

Fishmeal
Development of farmed fish: a nutritionally necessary alternative to meat. **58,** 377, 1999

Flavonoids
The bioavailability of non-nutrient plant factors: dietary flavonoids and phyto-oestrogens. **58,** 139, 1999

Antioxidants and lipoprotein metabolism. **58,** 663, 1999

Flavour
Manipulating meat quality and composition. **58,** 363, 1999

Fluid balance
Fluid balance status of patients referred for nutritional support. **58,** 114A, 1999

The use of multiple frequency bioimpedance to assess fluid balance in critical illness. **58,** 134A, 1999

Folate
Folate and vitamin B_{12}. **58,** 441, 1999

Folic acid
Women's perceptions of diet, folic acid and pregnancy. **58,** 53A, 1999

Food allergy
Evaluation of the impact of food technology on the allergenicity of cow's milk proteins. **58,** 587, 1999

Clinical features of food allergy in France based on 703 patients (1116 cases of food allergy). **58,** 74A, 1999

Epidemiological study of food allergy in France. **58,** 75A, 1999

Food availability
Food availability at a local level: do the poor have worse choice? **58,** 153A, 1999

Food budget standards
Low cost but acceptable food budget standards for households with young children. **58,** 159A, 1999

Food choice
Food choice and intake: the human factor. **58,** 513, 1999

Social determinants of food choice. **58,** 807, 1999

Food choice event frequencies predictive of individual fat intake: towards a self-assessment tool. **58,** 6A, 1999

Food choice in older adults: the role of information. **58,** 6A, 1999

Developing a national point-of-purchase guide to healthier food choices. **58,** 7A, 1999

An evaluation of the Wessex Healthy Schools Award: healthy eating. **58,** 9A, 1999

Costs of an (un)healthy diet: analysis from the UK Women's Cohort Study. **58,** 10A, 1999

Suitability and acceptability of a dietary interview-survey designed to identify barriers to food selection, by denture and non-denture wearers: a pilot study. **58,** 46A, 1999

Determinants of food choice at home in families in UK and in Pakistan. **58,** 154A, 1999

Socio-cultural determinants of children's food choice. **58,** 156A, 1999

Food composition
Composition and nutritional prospects of prickly pear fruit. **58,** 87A, 1999

Food culture
Diet, health and globalization: five key questions. **58,** 335, 1999

Food expenditure
Food expenditure and child growth in deprived families living in London. **58,** 158A, 1999

Food fortification
Microencapsulation of marine oils for use in food fortification. **58,** 103A, 1999

Food intake
What processes are involved in the appetite response to moderate increases in exercise-induced energy expenditure? **58,** 107, 1999

Investigation of salivary hormone secretion following food intake in man. **58,** 20A, 1999

Low meat eaters in north Glasgow: who are they and what else do they eat? **58,** 39A, 1999

The effect of phyto-oestrogen-rich foods on urinary output of phyto-oestrogen metabolites: a pilot study. **58,** 42A, 1999

Minimizing errors associated with coding 24 h dietary recalls for INTERMAP in the UK. **58,** 48A, 1999

Food intake and bone mineral status of Beijing adolescent girls. **58,** 65A, 1999

Contribution of mineral waters to dietary calcium intake in the French SU.VI.MAX cohort. **58,** 85A, 1999

Family resemblance in calcium intakes in the Stanislas Cohort. **58,** 85A, 1999

Food habits and growth of children of Subsaharan African ancestry born to immigrant parents and French children. **58,** 98A, 1999

Food intake of lactating women in rural Bangladesh. **58,** 102A, 1999

Socioeconomic differences in the dietary trends in Karachi. **58,** 153A, 1999

Food perception

Compared with olfactory and gustatory stimuli, visual stimuli are operative cues for the estimation by healthy young men of the nutritional composition of all kinds of biscuits. **58,** 78A, 1999

Edentulous persons attitudes and perceived barriers to increasing fruit and vegetable consumption. **58,** 150A, 1999

Perceptions of portion weights of different shapes of chips. **58,** 150A, 1999

Food policy

Diet, health and globalization: five key questions. **58,** 335, 1999

Food preferences

Food choice and intake: the human factor. **58,** 513, 1999

Food supply

Diet, health and globalization: five key questions. **58,** 335, 1999

China: the soyabean–pork dilemma **58,** 345, 1999

Free fatty acids

Skeletal muscle substrate metabolism during exercise: methodological considerations. **58,** 899, 1999

Free radicals

Free radicals in skin and muscle: damaging agents or signals for adaptation? **58,** 673, 1999

An overview of methods for assessment of free radical activity in biology. **58,** 1001, 1999

Analysis of cellular responses to free radicals: focus on exercise and skeletal muscle. **58,** 1025, 1999

Antipyrine as a marker for exercise-induced oxidative stress in untrained young adults. **58,** 170A, 1999

Determination of hydroxylated derivatives of antipyrine in plasma with HPLC-Tandem-Mass Spectrophotometry. **58,** 170A, 1999

Biological applications of electron paramagnetic resonance spectroscopy: methods and limitations. **58,** 171A, 1999

Fructo oligosaccharides

Physiological intake of chicory's fructo oligosaccharides does not change blood lipids and lipoproteins in healthy males. **58,** 88A, 1999

Fruit and vegetable consumption

Dietary influences on chronic obstructive lung disease and asthma: a review of the epidemiological evidence. **58,** 309, 1999

Fruit consumption

The impact of nutrition education intervention to increase fruit and vegetable consumption in an area of urban deprivation. **58,** 8A, 1999

Edentulous persons attitudes and perceived barriers to increasing fruit and vegetable consumption. **58,** 150A, 1999

Functional markers

Vitamin C: prospective functional markers for defining optimal nutritional status. **58,** 469, 1999

Optimal nutrition: calcium, magnesium and phosphorus. **58,** 477, 1999

Gallstones

Diet and gallstones in Saudi Women. **58,** 45A, 1999

Gastric emptying

Gastric emptying profile of solids is delayed in absence of colon. **58,** 15A, 1999

Effect of glucagon-like peptide-1 infusion on gastric emptying, energy intake and satiety in man. **58,** 16A, 1999

Effect of meal size and carbohydrate content on gastric emptying, energy intake and satiety in man. **58,** 16A, 1999

The evaluation of a triacylglycerol (TAG) analysis in gastric aspirates as a measure of gastric emptying in critically ill patients. **58,** 142A, 1999

Gastrointestinal function

The effects of specific nutrients on the regulation of feeding behaviour in human subjects. **58,** 533, 1999

Gastrointestinal parasites

Grazing trade-offs between forage intake and faecal avoidance in sheep: the effect of sward height, parasitic status and level of feeding motivation. **58,** 157A, 1999

Species composition of sheep diets when grazing grass/clover swards: the effect of parasitic status and level of feeding motivation. **58,** 157A, 1999

Gastrointestinal tract

The regulation of mineral absorption in the gastrointestinal tract. **58,** 147, 1999

Gene expression

Amino acid limitation regulates gene expression. **58,** 625, 1999

Effect of dietary cholesterol on the expression of the microsomal triglyceride transfer protein gene. **58,** 28A, 1999

Characterization of the regulatory regions of the glucose-6 phosphatase gene promoter in HepG2 cells. **58,** 74A, 1999

The effect of the 677C->T mutation on plasma homocysteine and 5,10-methylenetetrahydrofolate reductase (MTHFR) thermolability in healthy volunteers. **58,** 76A, 1999

Gastrin-stimulated pancreatic protein synthesis and activation of phosphatidyl inositol 3 (PI-3) kinase and p70-S6 kinase systems by gastrin via pancreatic cholecystokinin B/gastrin receptors. **58,** 79A, 1999

Differential regulation of glutamine and glutamate transport during Caco-2 cell differentiation: Transcriptional regulation of the glutamate transporter EAATI. **58,** 93A, 1999

Effects of polyunsaturated fatty acids and peroxisome proliferators on stearoyl-CoA desaturase 1 gene expression in chicken hepatoma cells. **58,** 104A, 1999

Activity and transcription level of malic enzyme (EC1.1.1.40) in muscles of Large White and Meishan pigs. **58,** 107A, 1999

Effect of refeeding on two mRNA species of lipoprotein lipase in adipose tissue and cardiac muscle of sheep. **58,** 108A, 1999

The percentage of mononuclear cells expressing adhesion molecule-1 increases with age. **58,** 136A, 1999

Gene regulation
Regulation of gene expression by glucose. **58,** 621, 1999

Selectivity of fatty acids on lipid metabolism and gene expression. **58,** 633, 1999

General practice
The relative validity of practice nurse dietary assessment in general practice. **58,** 46A, 1999

Genetics
The genetics of serum lipid responsiveness to dietary interventions. **58,** 171, 1999

Genistein
Effects of genistein and daidzein on ovariectomy-induced bone loss in rats. **58,** 96A, 1999

Geometric models
Assuaging nutritional complexity: a geometrical approach. **58,** 779, 1999

Global food model
Alternative futures for world cereal and meat consumption. **58,** 219, 1999

Globalization
Diet, health and globalization: five key questions. **58,** 335, 1999

Meat production in developing countries. **58,** 371, 1999

Glucagon-like peptide-1
Effect of glucagon-like peptide-1 infusion on gastric emptying, energy intake and satiety in man. **58,** 16A, 1999

Gluconeogenesis
Quantifying the contribution of gluconeogenesis to glucose production in fasted human subjects using stable isotopes. **58,** 963, 1999

Glucose
Regulation of gene expression by glucose. **58,** 621, 1999

Microdialysis of skeletal muscle at rest. **58,** 919, 1999

Measurement of glucose production during exercise in human subjects: comparison of the arteriovenous balance and isotopic tracer methods. **58,** 172A, 1999

Glucose-6-phosphatase
Characterization of the regulatory regions of the glucose-6 phosphatase gene promoter in HepG2 cells. **58,** 74A, 1999

Glutamine
Glutathione status in critically-ill patients: possibility of modulation by antioxidants. **58,** 677, 1999

Immunonutrition and surgical practice. **58,** 831, 1999

Effect of cholera toxin on glutamine metabolism and transport in rabbit ileum. **58,** 70A, 1999

Differential regulation of glutamine and glutamate transport during Caco-2 cell differentiation: Transcriptional regulation of the glutamate transporter EAATI. **58,** 93A, 1999

The effect of oral glutamine supplementation on growth faltering in Gambian infants. **58,** 121A, 1999

A double-blind, controlled trial of glutamine supplementation in parenteral nutrition. **58,** 113A, 1999

The stability of Glutamine after addition to a 3-compartment TPN bag. **58,** 137A, 1999

Glutathione
Glutathione status in critically-ill patients: possibility of modulation by antioxidants. **58,** 677, 1999

Glycerol
Glycerol production and utilization measured using stable isotopes. **58,** 973, 1999

Evidence for glycerol uptake by subcutaneous adipose tissue. **58,** 164A, 1999

Glycerol exchange in human skeletal muscle at rest and during exercise. **58,** 164A, 1999

Glycogen
NMR of glycogen in exercise. **58,** 851, 1999

Quantitation of human liver and muscle volume and glycogen concentration during exercise and recovery. **58,** 162A, 1999

Growth
The nutritional adequacy of plant-based diets. **58,** 265, 1999

Intake and feed efficiency of brown trout selected for growth. **58,** 91A, 1999

An audit of growth rate for infants on the neonatal unit, Children's Hospital, Leicester Royal Infirmary NHS Trust. **58,** 144A, 1999

Food expenditure and child growth in deprived families living in London. **58,** 158A, 1999

Guar gum
Guar gum increases but dietary cholesterol suppresses intestinal tumourigenesis in the *Min* mouse. **58,** 72A, 1999

The cholesterol-lowering effect of guar gum is accompanied by an increase of bile acid digestive pools and intestinal reabsorption. **58,** 94A, 1999

Habitat selection
Habitat selection according to the ability of animals to eat, digest and detoxify foods. **58,** 799, 1999

Haemodialysis
Energy balance in chronic haemodialysis. **58,** 128A, 1999

Haemoglobin
Haemoglobin levels of first year female undergraduates. **58,** 38A, 1999

Healthy eating
A comparison of the effect of two types of healthy eating dietary advice on perceived quality of life in Scottish men. **58,** 2A, 1999

Developing a national point-of-purchase guide to healthier food choices. **58,** 7A, 1999

An evaluation of the Wessex Healthy Schools Award: healthy eating. **58,** 9A, 1999

Fruit, vegetable and fat consumption of people who believe their diet is healthy. **58,** 9A, 1999

Nutritional knowledge and attitudes to healthy eating amongst Surrey schoolchildren: preliminary data. **58,** 10A, 1999

Food availability at a local level: do the poor have worse choice? **58,** 153A, 1999

Heart disease
The bioavailability of non-nutrient plant factors: dietary flavonoids and phyto-oestrogens. **58,** 139, 1999

Optimal nutrition: fibre and phytochemicals. **58,** 415, 1999

Heart muscle
Metabolic differentiation of the bovine heart muscle during fetal development. **58,** 86A, 1999

Herbivore
Habitat selection according to the ability of animals to eat, digest and detoxify foods. **58,** 799, 1999

Hereditary influence
What are the major correlates of macronutrient selection in Western populations? **58,** 755, 1999

Hibernation
Preparing for inactivity: how insectivorous bats deposit a fat store for hibernation. **58,** 123, 1999

HIV infection
Nutrition and immune function in human immunodeficiency virus infection. **58,** 743, 1999

The effect of breast-feeding on vitamin A status of infants of human immunodeficiency virus positive (HIV+) women with or without vitamin A supplementation. **58,** 57A, 1999

Homocysteine
Variability over 6 years in blood homocysteine concentration in an elderly population in Hertfordshire and relationship with heart disease. **58,** 3A, 1999

The effect of the 677C->T mutation on plasma homocysteine and 5,10-methylenetetrahydrofolate reductase (MTHFR) thermolability in healthy volunteers. **58,** 76A, 1999

Hospital patients
An evaluation of the use of enteral nutritional supplements post operatively in malnourished surgical patients. **58,** 112A, 1999

Development and validation of nutritional risk assessment for routine use in an acute hospital Trust. **58,** 119A, 1999

Nutritional status of patients on admission to acute services of a London teaching hospital. **58,** 119A, 1999

Validation of a nutritional screening tool: testing the reliability and validity. **58,** 120A, 1999

Energy content of abnormal losses from intensive care patients. **58,** 125A, 1999

The incidence of malnutrition in medical patients admitted to a hospital in south London. **58,** 126A, 1999

Distress from hunger in patients receiving parenteral nutrition at home and hospital. **58,** 132A, 1999

The evaluation of a triacylglycerol (TAG) analysis in gastric aspirates as a measure of gastric emptying in critically ill patients. **58,** 142A, 1999

Changing feeding practices in Intensive care 1996–1998. **58,** 146A, 1999

Catering for elderly hospital patients: a study of food choice in hip-fracture patients and the selection of suitable foods for supplementation. **58,** 148A, 1999

Human immunodeficiency virus
Role of cytokines in the decrease of food intake during human immunodeficiency virus (HIV) infection. **58,** 97A, 1999

The effect of nutritional supplementation on weight and clinical management of patients with human immunodeficiency virus (HIV) infection in rural Uganda. **58,** 154A, 1999

Human milk
Environment and infant immunity. **58,** 729, 1999

3-Hydroxy-isovalerate excretion
Optimum nutrition: thiamin, biotin and pantothenate. **58,** 427, 1999

Hydroxymethylglutaryl-CoA reductase
Cholesterol uptake and hydroxymethylglutaryl (HMG)-CoA reductase activity of Caco-2-cell-line clones. **58,** 100A, 1999

Hyperaemia
Limb and skeletal muscle blood flow measurements at rest and during exercise in human subjects. **58,** 887, 1999

Hyperglycaemia
Thermogenic effect of slight hyperglycaemia during a lipid infusion. **58,** 73A, 1999

Hypertension
The long-term consequences of intra-uterine protein malnutrition for glucose metabolism. **58,** 615, 1999

15-Hydroxy-prostaglandin dehydrogenase activity is altered in a rat model of the fetal origins of adult hypertension. **58,** 51A, 1999

Hypoallergenicity
Evaluation of the impact of food technology on the allergenicity of cow's milk proteins. **58,** 587, 1999

Hypobaric hypoxia
Effects of extreme environments on food intake in human subjects. **58,** 791, 1999

Ileum
Effect of cholera toxin on glutamine metabolism and transport in rabbit ileum. **58,** 70A, 1999

Immune function
Prematurity, immune function and infant feeding practices. **58,** 75, 1999

Effects of dietary antioxidants on the immune function of middle-aged adults. **58,** 79, 1999

Vitamin E and infectious diseases in the aged. **58,** 697, 1999

Effects of carotenoids on human immune function. **58,** 713, 1999

Exercise and immune function: effect of ageing and nutrition. **58,** 733, 1999

The immunolocalization of apolipoprotein B-48 and B-100 in human tissues. **58,** 23A, 1999

Immune response
Immune response during disease and recovery in the elderly. **58,** 85, 1999

Nutrition and immunology: from the clinic to cellular biology and back again. **58,** 681, 1999

Immune system
Nutrition and immunity in the elderly. **58,** 685, 1999

Immunity
Vitamin A and immunity to viral, bacterial and protozoan infections. **58,** 719, 1999

Magnesium deficiency enhances immune stress response by altering cell calcium homeostasis. **58,** 90A, 1999

Dietary eicosapentaenoic acid modulates the immune system in Balb/c mice. **58,** 135A, 1999

Immunology
The influence of the maternal uterine immune response on placentation in human subjects. **58,** 69, 1999

Immunonutrition and surgical practice. **58,** 831, 1999

***In vitro* gas production technique**
Optimization of an *in vitro* gas production technique for measuring fibrolytic activity of equine intestinal contents. **58,** 80A, 1999

Infant feeding
Polyamines in preterm human milk and infant formulas. **58,** 41A, 1999

Infant feeding practices
Prematurity, immune function and infant feeding practices. **58,** 75, 1999

Infant formulas
Evaluation of the impact of food technology on the allergenicity of cow's milk proteins. **58,** 587, 1999

Infants
Nutrition and immunology: from the clinic to cellular biology and back again. **58,** 681, 1999

Infection
Nutrition and immunology: from the clinic to cellular biology and back again. **58,** 681, 1999

Nutrition and immunity in the elderly. **58,** 685, 1999

Vitamin A and immunity to viral, bacterial and protozoan infections. **58,** 719, 1999

Infectious disease
Vitamin E and infectious diseases in the aged. **58,** 697, 1999

Influenza
Vitamin E and infectious diseases in the aged. **58,** 697, 1999

Insectivorous bats
Preparing for inactivity: how insectivorous bats deposit a fat store for hibernation. **58,** 123, 1999

Insects
Assuaging nutritional complexity: a geometrical approach. **58,** 779, 1999

Insulin
NMR of glycogen in exercise. **58,** 851, 1999

Influence of a reduced saturated fat and isoenergetic increase in carbohydrate intake on the insulin sensitivity of glucose disposal in middle-aged men. **58,** 21A, 1999

The effect of marine fish oil supplementation on insulin sensitivity in the dog. **58,** 21A, 1999

Relationship between waist:hip ratio, waist circumference and postprandial insulin response in post-menopausal women. **58,** 22A, 1999

Effects of fish oil, olive oil, butter oil and maize oil on insulin resistance after turpentine-induced inflammation in the rat. **58,** 27A, 1999

Effect of chronic heat exposure on liver insulin receptor number and affinity in broiler chickens. **58,** 101A, 1999

Pre- and postprandial changes in plasma leptin and insulin concentrations during underfeeding and refeeding in dry cows. **58,** 108A, 1999

Insulin resistance
The long-term consequences of intra-uterine protein malnutrition for glucose metabolism. **58,** 615, 1999

The impact of dietary protein restriction on insulin secretion and action. **58,** 647, 1999

Insulin-like growth factor binding protein-1
Amino acid limitation regulates gene expression. **58,** 625, 1999

Insulin-like growth factor binding protein-1: a potential marker for carbohydrate intake? **58,** 45A, 1999

Intake
Iron intake in young children in relation to body weight and energy intake. **58,** 41A, 1999

Interstitial fluid
Methodological modifications using the microdialysis technique in the peritendinous tissue during exercise. **58,** 173A, 1999

In vivo comparison of three microdialysis probe types used in the monitoring of interstitial glycerol, glucose and lactate. **58,** 174A, 1999

Intestine
Within-individual variability in the gastrointestinal handling and metabolism of [1,1,1-^{13}C]tripalmitin. **58,** 25A, 1999

Luminal riboflavin is essential for normal morphological development of the gastrointestinal tract. **58,** 55A, 1999

Fibrolytic activities in caecal and colonic microbial ecosystems in ponies: effect of the presentation of the forage. **58,** 80A, 1999

Optimization of an *in vitro* gas production technique for measuring fibrolytic activity of equine intestinal contents. **58,** 80A, 1999

Bioavailability of starch, rate of glucose absorption and intestinal metabolism in pigs. **58,** 94A, 1999

Age related changes in intestinal permeability in a rural West African population. **58,** 125A, 1999

Intramyocellular lipids
Observation of intramyocellular lipids by means of ^{1}H magnetic resonance spectroscopy. **58,** 841, 1999

Inulin
The effect of the daily ingestion of inulin on fasting and postprandial lipid metabolism in middle-aged men and women. **58,** 22A, 1999

Iodine
Functional indicators of iodine and selenium status. **58,** 507, 1999

Iodine intake and iodine status in vegans. **58,** 36A, 1999

Assessment of goitre prevalence and nutritional status of schoolchildren in the mountainous region of Surakarta, Indonesia. **58,** 58A, 1999

Iron
Haemoglobin levels of first year female undergraduates. **58,** 38A, 1999

Iron intake in young children in relation to body weight and energy intake. **58,** 40A, 1999

Assessment of dietary intake of vitamin A and iron by lactating Indian women. **58,** 57A, 1999

The regulation of mineral absorption in the gastrointestinal tract. **58,** 147, 1999

Relationships between dietary restraint, dietary iron intake and iron status in adolescent females. **58,** 151A, 1999

Iron deficiency

Animal- and plant-food-based diets and iron status: benefits and costs. **58,** 235, 1999

Defining optimal body iron. **58,** 489, 1999

Ischaemic heart disease

Health benefits of a vegetarian diet. **58,** 271, 1999

Isotope labelling

Isotopes in nutrition research. **58,** 15, 1999

An introduction to the use of tracers in nutrition and metabolism. **58,** 935, 1999

Isotope measurement

Isotopes in nutrition research. **58,** 15, 1999

Isotope ratio mass spectrometry

Measurement of [U-^{13}C]glucose enrichment by GC combustion (GC-C-) isotope ratio mass spectrometry (IRMS). Precision and reproducibility of laboratory standards and biological samples. **58,** 165A, 1999

Jejunum

Caseinomacropeptide release in human jejenum during digestion of a concentrated casein meal. **58,** 89A, 1999

Lactate

Microdialysis of skeletal muscle at rest. **58,** 919, 1999

Lactate production in response to glucose and triacylglycerol infusion at rest and during aerobic exercise in human subjects. **58,** 165A, 1999

Lactation

Feeding pattern of sucking rabbits. Effects of litter size. **58,** 82A, 1999

Food intake of lactating women in rural Bangladesh. **58,** 102A, 1999

Lactic acid bacteria

Global analysis of two-dimensional protein patterns of the lactic acid bacterium *Streptococcus thermophilus*. **58,** 96A, 1999

β-lactoglobulin

β-lactoglobulin modifications characterized by mass spectrophotometry lead to different activity on hybridoma cell culture. **58,** 95A, 1999

Lactoperoxidase

Optimization of anti-*Listeria monocytogenes* combinations of bacteriocins (nisin, curvaticin 13) and lactoperoxidase system in broth and milk. **58,** 93A, 1999

Legumes

China: the soyabean–pork dilemma **58,** 345, 1999

Leptin

Fasting leptin responses to increases in fat balance induced by 50% fat and carbohydrate overfeeding in lean and obese women. **58,** 24A, 1999

Effects of vitamin A deficiency during pregnancy on reproductive outcome and plasma vitamin E and leptin concentrations in the rat. **58,** 58A, 1999

Restoration of full reproductive capacity in male and female *ob/ob* mice by chronic leptin administration. **58,** 68A, 1999

Comparison of dietary restriction alone with leptin treatment on spermatogenesis in male *ob/ob* mice. **58,** 68A, 1999

Circulating form of human leptin. **58,** 69A, 1999

Effects of adrenaline, noradrenaline and isoprenaline on circulating leptin levels in mice. **58,** 69A, 1999

Reduced efficacy of leptin on weight reduction in *ob/ob* mice when administered at thermoneutrality. **58,** 92A, 1999

Pre- and postprandial changes in plasma leptin and insulin concentrations during underfeeding and refeeding in dry cows. **58,** 108A, 1999

Arterialized plasma leptin concentrations and adipose tissue leptin production following oral and intravenous administration of a lipid emulsion. **58,** 172A, 1999

Lifestyle

Dietary intake and lifestyle patterns amongst Surrey teenage girls: preliminary findings. **58,** 37A, 1999

Lignans

Phyto-oestrogens: a potential role in the prevention of CHD? **58,** 193, 1999

Linoleic acid

Effects of ruminal or postruminal fish oil supply on conjugated linoleic acid (CLA) content of bovine milk fat. **58,** 70A, 1999

The metabolism of [^{13}C]-linoleic acid in healthy men and women. **58,** 167A, 1999

Lipids

Effects of the nature and the quantity of dietary lipids on the expression of retinoic acid (RAR) and triiodothyronine (TR) nuclear receptors in the rat liver. **58,** 73A, 1999

Effects of dietary lipid source on membrane phospholipid composition and lipid mobilization in perirenal adipose tissue. **58,** 101A, 1999

Lipid intake

Effects of increasing dietary lipid levels on lipogenic enzyme activities in liver of rainbow trout (*Oncorhynchus mykiss*). **58,** 83A, 1999

Lipid metabolism

The effect of the daily ingestion of inulin on fasting and postprandial lipid metabolism in middle-aged men and women. **58,** 22A, 1999

Within-individual variability in the gastrointestinal handling and metabolism of [1,1,1-^{13}C]tripalmitin. **58,** 25A, 1999

Acute effects of alcohol on postprandial lipid metabolism. **58,** 32A, 1999

Influence of a reduced saturated fat and isoenergetic increase in carbohydrate intake on postprandial lipaemia in middle-aged men. **58,** 32A, 1999

Effect of meals of differing composition on postprandial fatty acid composition of LDL. **58,** 33A, 1999

Postprandial lipaemic responses to hydrogenated soyabean oil and native soyabean oil in healthy volunteers. **58,** 33A, 1999

Paradoxical relationships between adiposity and lipaemia in individuals with an atherogenic lipoprotein phenotype (ALP). **58**, 34A, 1999

Within-individual variability in postprandial lipaemia following oral ingestion of [1,1,1-^{13}C]tripalmitin in healthy young subjects. **58**, 35A, 1999

Body fatness and circulating triacylglycerol concentration in relation to pre- and postnatal dietary experience in the rat. **58**, 52A, 1999

Physiological intake of chicory's fructo oligosaccharides does not change blood lipids and lipoproteins in healthy males. **58**, 88A, 1999

Differential liver lipid channelling in relation to susceptibility to hepatic steatosis in the goose. **58**, 105A, 1999

Effects of dietary coconut oil on the hepatic synthesis of apolipoprotein B, microsomal triacylglycerol transfer protein and LDL-receptor in the preruminant calf. **58**, 105A, 1999

The effect of a single exercise session on postprandial chylomicron, VLDL and total plasma triacylglycerol concentrations. **58**, 122A, 1999

"Chylomicron" composition following oral and intravenous administration of a lipid emulsion. **58**, 130A, 1999

Regulation of non-esterified fatty acid release from human subcutaneous adipose tissue after an overnight fast. **58**, 171A, 1999

Lipid peroxidation

Does exercise induce oxidative stress in endurance-trained kidney and heart transplant recipients? **58**, 169A, 1999

Exercise in healthy adult dogs increases plasma thiobarbituric acid reactive substances (TBARS), an indicator of oxidative stress. **58**, 169A, 1999

Lipogenesis

Present and future studies on lipogenesis in animals and human subjects. **58**, 541, 1999

Hepatic lipogenesis in relation to fatty liver in the goose. **58**, 104A, 1999

Lipogenesis in isolated adipocytes from two subcutaneous adipose tissues in Large White and Meishan pigs. **58**, 106A, 1999

Lipolysis

Use of stable isotopes to study carbohydrate and fat metabolism at the whole-body level. **58**, 953, 1999

Glycerol production and utilization measured using stable isotopes. **58**, 973, 1999

Lipoproteins

The genetics of serum lipid responsiveness to dietary interventions. **58**, 171, 1999

Validity of animal models for the cholesterol-raising effects of coffee diterpenes in human subjects. **58**, 551, 1999

Oxidant stress: the role of nutrients in cell–lipoprotein interactions. **58**, 559, 1999

Antioxidants and lipoprotein metabolism. **58**, 663, 1999

Effects of fish oil supplementation on *in vitro* oxidation of LDL in subjects with an atherogenic lipoprotein phenotype. **58**, 24A, 1999

Dietary fish oil reduces the expression and function of the LDL scavenger receptor in mice. **58**, 27A, 1999

Effect of meals of differing composition on postprandial fatty acid composition of LDL. **58**, 33A, 1999

Paradoxical relationships between adiposity and lipaemia in individuals with an atherogenic lipoprotein phenotype (ALP). **58**, 34A, 1999

Inhibitory effect of procyanidin-containing extracts on LDL oxidation *in vitro*. **58**, 91A, 1999

Lipoprotein-cholesterol

Strategies for altering population intakes of fats and fatty acids. **58**, 189, 1999

Liver

Effects of the nature and the quantity of dietary lipids on the expression of retinoic acid (RAR) and triiodothyronine (TR) nuclear receptors in the rat liver. **58**, 73A, 1999

Effect of chronic heat exposure on liver insulin receptor number and affinity in broiler chickens. **58**, 101A, 1999

Hepatic lipogenesis in relation to fatty liver in the goose. **58**, 104A, 1999

Differential liver lipid channelling in relation to susceptibility to hepatic steatosis in the goose. **58**, 105A, 1999

Livestock systems

Meat production in developing countries. **58**, 371, 1999

Low-birth-weight infants

Nutrition and immunology: from the clinic to cellular biology and back again. **58**, 681, 1999

Lung

The effects of vitamin C supplementation on dynamic lung function: a double-blind cross-over trial. **58**, 44A, 1999

Lung cancer

Nutrition and lung health. **58**, 303, 1999

Vitamins and lung cancer. **58**, 329, 1999

Lymphocytes

Exercise and immune function: effect of ageing and nutrition. **58**, 733, 1999

The level of protein in the diet of pregnant rats affects lymphocyte proliferation and natural killer cell activity in the offspring at weaning. **58**, 124A, 1999

Lysine

The nutritional value of plant-based diets in relation to human amino acid and protein requirements. **58**, 249, 1999

The effects of specific nutrients on the regulation of feeding behaviour in human subjects. **58**, 533, 1999

What are the major correlates of macronutrient selection in Western populations? **58**, 755, 1999

Effects of extreme environments on food intake in human subjects. **58**, 791, 1999

Macronutrients

The effects of specific nutrients on the regulation of feeding behaviour in human subjects. **58**, 533, 1999

What are the major correlates of macronutrient selection in Western populations? **58**, 755, 1999

Effects of extreme environments on food intake in human subjects. **58**, 791, 1999

Magnesium
Influence of diet type, potassium and animal species on the absorption of magnesium by ruminants. **58,** 31A, 1999

Magnesium and calcium absorption from a sulfate-rich natural mineral water in ileostomy subjects. **58,** 77A, 1999

Magnesium deficiency enhances immune stress response by altering cell calcium homeostasis. **58,** 90A, 1999

Optimal nutrition: calcium, magnesium and phosphorus. **58,** 477, 1999

Magnetic resonance imaging
Observation of intramyocellular lipids by means of ^{1}H magnetic resonance spectroscopy. **58,** 841, 1999

Magnetic resonance spectroscopy
Observation of intramyocellular lipids by means of ^{1}H magnetic resonance spectroscopy. **58,** 841, 1999

Introduction to in vivo ^{31}P magnetic resonance spectroscopy of (human) skeletal muscle. **58,** 861, 1999

Magnetic resonance spectroscopy: a useful tool to investigate the relationship between delayed onset muscle soreness and muscle metabolism. **58,** 163A, 1999

Maillard reaction
Functionality of nutrients and thermal treatments of food. **58,** 579, 1999

Malaria
Vitamin A and immunity to viral, bacterial and protozoan infections. **58,** 719, 1999

Malnutrition
Problems of nutritional assessment in the community. **58,** 47, 1999

The pulmonary cachexia syndrome: aspects of energy balance. **58,** 321, 1999

Outcomes of undernutrition in patients in the community with cancer or cardiovascular disease. **58,** 655, 1999

Malnutrition and dietary inadequacy among rural elderly Malays: simple indices to identify individuals at high risk. **58,** 4A, 1999

Energy balance during post-partum amenorrhea among chronically malnourished women in rural Bangladesh. **58,** 75A, 1999

Disease-related malnutrition: existence, causes and consequences, and clinical and financial benefits of nutritional intervention. **58,** 111A, 1999

Evidence and consequences of disease-related malnutrition in the community. **58,** 111A, 1999

Can the true prevalence of malnutrition be assessed by admission to hospital? **58,** 112A, 1999

The incidence of malnutrition in medical patients admitted to a hospital in south London. **58,** 126A, 1999

Over 75s' annual health assessments: an opportunity to identify individuals 'at-risk' of under-nutrition? **58,** 131A, 1999

The prevalence of malnutrition in patients admitted to Care of the Elderly wards. **58,** 139A, 1999

Manganese
Considerations for determining 'optimal nutrition' for copper, zinc, manganese and molybdenum. **58,** 497, 1999

Markers of nutrient status
Current knowledge concerning optimum nutritional status of riboflavin, niacin and pyridoxine. **58,** 435, 1999

Mass-isotopomer analysis
Quantifying the contribution of gluconeogenesis to glucose production in fasted human subjects using stable isotopes. **58,** 963, 1999

Mass spectrophotometry
β-lactoglobulin modifications characterized by mass spectrophotometry lead to different activity on hybridoma cell culture. **58,** 95A, 1999

Maternal nutrition
The influence of maternal nutrient restriction in early to mid-pregnancy on placental and fetal development in sheep. **58,** 283, 1999

Impairment of fetal kidney development induced by maternal protein restriction in the rat. **58,** 51A, 1999

Body fatness and circulating triacylglycerol concentration in relation to pre- and postnatal dietary experience in the rat. **58,** 52A, 1999

Influence of pre- and postnatal diet upon skeletal muscle fibre composition in the rat. **58,** 52A, 1999

Early maternal dietary protein manipulation and adult offspring cholesterol metabolism. **58,** 53A, 1999

Effects of vitamin A deficiency during pregnancy on reproductive outcome and plasma vitamin E and leptin concentrations in the rat. **58,** 58A, 1999

Cross-population differences in Mauritian and French mothers' white adipose tissue (WAT) and milk and their influences on the erythrocyte phospholipid composition of their breastfed infants. **58,** 97A, 1999

The level of protein in the diet of pregnant rats affects lymphocyte proliferation and natural killer cell activity in the offspring at weaning. **58,** 124A, 1999

Meal pattern
What are the major correlates of macronutrient selection in Western populations? **58,** 755, 1999

Measles
Vitamin A and immunity to viral, bacterial and protozoan infections. **58,** 719, 1999

Meat
High-meat diets and cancer risk **58,** 243, 1999

Manipulating meat quality and composition. **58,** 363, 1999

Meat production in developing countries. **58,** 371, 1999

Increasing stearoyl Co-A desaturase activity: a potential method to reduce the saturated fatty acid content of lamb meat. **58,** 29A, 1999

Dose response effect with dietary meat on faecal *N*-nitroso-compound and nitrogen excretion in subjects. **58,** 43A, 1999

Meat intake
Alternative futures for world cereal and meat consumption. **58,** 219, 1999

Meat and colo-rectal cancer. **58,** 261, 1999

Metabolic rate
Skeletal muscle substrate metabolism during exercise: methodological considerations. **58,** 899, 1999

Metabolism
Reproducibility of measurement of resting metabolic rate in boys and girls aged 6-11 years. **58,** 59A, 1999

Metal ion absorption
The regulation of mineral absorption in the gastrointestinal tract. **58,** 147, 1999

Methionine
Effects of protected methionine in a fattening diet for culled cows and heifers. **58,** 81A, 1999

Methylation cycle
Folate and vitamin B_{12}. **58,** 441, 1999

Microdialysis
Micordialysis: use in human exercise studies. **58,** 913, 1999

Microdialysis of skeletal muscle at rest. **58,** 919, 1999

Microdialysis technique
Estimation of rat muscle blood flow by microdialysis probes perfused with ethanol [^{14}C]ethanol and $^{3}H_2O$. **58,** 174A, 1999

In vivo comparison of three microdialysis probe types used in the monitoring of interstitial glycerol, glucose and lactate. **58,** 174A, 1999

Human muscle interstitial K^+ measured by microdialysis during rest and exercise. **58,** 175A, 1999

Methodological modifications using the microdialysis technique in the peritendinous tissue during exercise. **58,** 173A, 1999

Microflora
Environment and infant immunity. **58,** 729, 1999

Micronutrients
Micronutrients and ageing: intakes and requirements. **58,** 573, 1999

Nutrition and immune function in human immunodeficiency virus infection. **58,** 743, 1999

Micronutrient status and other risk factors for CHD in a working male population. **58,** 2A, 1999

The effect of self-selected dietary supplements on micronutrient intakes in vegans. **58,** 35A, 1999

Circulating concentrations of vitamins D, C and thiamin in disabled patients on long-term enteral tube feeding. **58,** 129A, 1999

Starch and NSP are associated with higher micronutrient intakes in young children. **58,** 155A, 1999

Micronutrient status
Vitamin C: prospective functional markers for defining optimal nutritional status. **58,** 469, 1999

Milk treatment
The technological treatment of bovine milk: influence on cell culture. **58,** 84A, 1999

Mineral intake
The influence of diet on indicators of iron, copper and zinc status in children under 24 months: preliminary findings. **58,** 40A, 1999

Molybdenum
Considerations for determining 'optimal nutrition' for copper, zinc, manganese and molybdenum. **58,** 497, 1999

Monocyte
Effects of carotenoids on human immune function. **58,** 713, 1999

Mood
The effects of high-fat and low-fat diets on mood, energy expenditure, neurohumoral function and blood lipids. **58,** 18A, 1999

Effects of different sugars on mood and cognitive performance. **58,** 19A, 1999

Mortality
Health benefits of a vegetarian diet. **58,** 271, 1999

Muscle
NMR of glycogen in exercise. **58,** 851, 1999

Limb and skeletal muscle blood flow measurements at rest and during exercise in human subjects. **58,** 887, 1999

Influence of pre- and postnatal diet upon skeletal muscle fibre composition in the rat. **58,** 52A, 1999

Effects of feed restriction during fattening on muscle lipid traits in the rabbit. **58,** 84A, 1999

Activity and transcription level of malic enzyme (EC1.1.1.40) in muscles of Large White and Meishan pigs. **58,** 107A, 1999

Nutritional regulation of lipoprotein lipase activity in bovine adipose tissues and muscles. **58,** 109A, 1999

A simple ergometer for in vivo nuclear magnetic resonance (NMR) spectroscopy studies of human calf muscle. **58,** 161A, 1999

Phosphorus-31 nuclear magnetic resonance spectroscopy (^{31}P-MRS) and near infrared spectroscopy (NIRS) detected oxidative capacity of human gastrocnemius muscles. **58,** 162A, 1999

Magnetic resonance spectroscopy: a useful tool to investigate the relationship between delayed onset muscle soreness and muscle metabolism. **58,** 163A, 1999

Glycerol exchange in human skeletal muscle at rest and during exercise. **58,** 164A, 1999

***n*-3 Polyunsaturated fatty acids**
Dietary influences on chronic obstructive lung disease and asthma: a review of the epidemiological evidence. **58,** 309, 1999

Unsaturated fatty acids. **58,** 397, 1999

National Food Survey
A comparison between the National Food Survey (NFS) and the Family Expenditure Survey (FES) data. **58,** 152A, 1999

Natural killer cells
The influence of the maternal uterine immune response on placentation in human subjects. **58,** 69, 1999

Neonatal nutrition
Early nutrition modulates adipose tissue development in neonatal pigs. **58,** 83A, 1999

Feeding practices in special care baby units: a survey of units in the United Kingdom. **58,** 117A, 1999

Assessing the potential for changing the pharmacist's role in prescribing neonatal parenteral nutrition. **58,** 137A, 1999

An audit of growth rate for infants on the neonatal unit, Children's Hospital, Leicester Royal Infirmary NHS Trust. **58,** 144A, 1999

Neural-tube defect
Folate and vitamin B_{12}. **58,** 441, 1999

Niacin status
Current knowledge concerning optimum nutritional status of riboflavin, niacin and pyridoxine. **58,** 435, 1999

Nitric oxide
Vasoactive substances in the interstitium of contracting skeletal muscle examined by microdialysis. **58,** 925, 1999

Increased *in vivo* liver nitric oxide production during endotoxin challenge in pigs. **58,** 167A, 1999

In vivo whole-body nitric oxide synthesis, determined by the conversion of [$^{15}N_2$]arginine to [^{15}N]citrulline, is not increased in acute endotoxin-treated mice. **58,** 168A, 1999

Nitrogen metabolism
Dose response effect with dietary meat on faecal *N*-nitroso-compound and nitrogen excretion in subjects. **58,** 43A, 1999

***N*-Nitroso compounds**
High-meat diets and cancer risk **58,** 243, 1999

Non-insulin-dependent diabetes mellitus
The long-term consequences of intra-uterine protein malnutrition for glucose metabolism. **58,** 615, 1999

The impact of dietary protein restriction on insulin secretion and action. **58,** 647, 1999

Nuclear magnetic resonance spectroscopy
A simple ergometer for in vivo nuclear magnetic resonance (NMR) spectroscopy studies of human calf muscle. **58,** 161A, 1999

Phosphorus-31 nuclear magnetic resonance spectroscopy (^{31}P-MRS) and near infrared spectroscopy (NIRS) detected oxidative capacity of human gastrocnemius muscles. **58,** 162A, 1999

Nurses
Nurse awareness and knowledge of nutrition. **58,** 120A, 1999

Perception of supplementary sip feeds given to patients by nursing assistants working in a variety of settings in Northamptonshire. **58,** 140A, 1999

Attitudes of nutrition nurses to their role, to nutrition education and to relationships with dietitians. **58,** 145A, 1999

Nutrition in nurse education. **58,** 146A, 1999

Nutrient intake
The food and nutrient intake of students before commencing university and during the first semester. **58,** 38A, 1999

Changes in nutrient intake after changing to a self-selected vegetarian diet for 18 months. **58,** 39A, 1999

Evaluation of a bar-code system for nutrient analysis in dietary surveys. **58,** 49A, 1999

Nutrient intake and bone health in ballet dancers and healthy age-matched controls: preliminary findings from a longitudinal study on peak bone mass development in adolescent females. **58,** 64A, 1999

Nutrient intake in peri and early post-menopausal Scottish women: preliminary findings from a longitudinal study on bone health. **58,** 62A, 1999

Effect of healthy-eating advice and consumption of reduced-fat 'ready meals' on nutrient intake in healthy free-living volunteers. **58,** 152A, 1999

Nutrient status
Assuaging nutritional complexity: a geometrical approach. **58,** 779, 1999

Nutrition education
The impact of nutrition education intervention to increase fruit and vegetable consumption in an area of urban deprivation. **58,** 8A, 1999

Attitudes of nutrition nurses to their role, to nutrition education and to relationships with dietitians. **58,** 145A, 1999

Nutrition in nurse education. **58,** 146A, 1999

Effect of healthy-eating advice and consumption of reduced-fat 'ready meals' on nutrient intake in healthy free-living volunteers. **58,** 152A, 1999

Nutrition intervention
Disease-related malnutrition: existence, causes and consequences, and clinical and financial benefits of nutritional intervention. **58,** 111A, 1999

Nutrition screening
Can the true prevalence of malnutrition be assessed by admission to hospital? **58,** 112A, 1999

Evidence and consequences of disease-related malnutrition in the community. **58,** 111A, 1999

Nutrition Support Team
Audit of General Practitioner's GP knowledge of and satisfaction with the service provided by the nutrition support team to patients at home receiving artificial nutrition. **58,** 141A, 1999

Nutritional assessment
Considerations for determining 'optimal nutrition' for copper, zinc, manganese and molybdenum. **58,** 497, 1999

Pre-operative nutritional assessment. **58,** 821, 1999

Adequacy of revised UK reference data for nutritional assessment of 7–8 year olds. **58,** 47A, 1999

Nutritional deficiency
Selenium and host defence towards viruses. **58,** 707, 1999

Nutritional intervention
Evidence-based practice: its relevance to nutritional intervention programmes. **58,** 50A, 1999

Nutritional knowledge
Assessing nutritional knowledge in prepubescent children using 'draw and tell' methodology. **58,** 49A, 1999

Nurse awareness and knowledge of nutrition. **58,** 120A, 1999

Nutritional modelling
Modelling in nutrition: an introduction. **58,** 133, 1999

Nutritional requirements
The nutritional adequacy of plant-based diets. **58,** 265, 1999

Nutritional screening
Pre-operative nutritional assessment. **58,** 821, 1999

Development and validation of nutritional risk assessment for routine use in an acute hospital Trust. **58,** 119A, 1999

Validation of a nutritional screening tool: testing the reliability and validity. **58,** 120A, 1999

An evaluation of estimating patients weights as an accurate method when compared with actual weight. **58,** 144A, 1999

Nutritional screening tools
Problems of nutritional assessment in the community. **58,** 47, 1999

Nutritional status
Problems of nutritional assessment in the acute setting. **58,** 39, 1999

Problems of nutritional assessment in the community. **58,** 47, 1999

Functionality of nutrients and thermal treatments of food. **58,** 579, 1999

Nutrition and immunity in the elderly. **58,** 685, 1999

Nutrition and immune function in human immunodeficiency virus infection. **58,** 743, 1999

Nutritional status and functional ability of older refugees. **58,** 3A, 1999

The relationship between nutritional status and functional ability among older people in rural Malawi. **58,** 4A, 1999

Nutritional status at diagnosis in a national cohort of children with acute lymphoblastic leukaemia. **58,** 14A, 1999

Nutritional status of patients on admission to acute services of a London teaching hospital. **58,** 119A, 1999

Health-related quality of life and nutritional outcomes after percutaneous endoscopic gastrostomy (PEG): A prospective study. **58,** 127A, 1999

Hand-grip strength in cirrhosis: Its relationship to nutritional status and severity of liver disease. **58,** 128A, 1999

A cross-sectional study of nutritional outcomes after percutaneous endoscopic gastrostomy (PEG): results and problems of assessment. **58,** 141A, 1999

Nutritional supplementation
The effect of nutritional supplementation on weight and clinical management of patients with human immunodeficiency virus (HIV) infection in rural Uganda. **58,** 154A, 1999

Nutritional supplements
Characterizing dietary supplement use in women. **58,** 11A, 1999

An evaluation of the use of enteral nutritional supplements post operatively in malnourished surgical patients. **58,** 112A, 1999

Perception of supplementary sip feeds given to patients by nursing assistants working in a variety of settings in Northamptonshire. **58,** 140A, 1999

An audit of prescribing patterns of oral nutritional supplements in primary care. **58,** 142A, 1999

Nutritional support
Audit of a home enteral feeding service against the British Association for Parenteral and Enteral Nutrition (BAPEN) standards. **58,** 114A, 1999

Fluid balance status of patients referred for nutritional support. **58,** 114A, 1999

Complications experienced by patients on home enteral tube feeding in Dublin. **58,** 115A, 1999

Functional status of adult patients on home enteral tube feeding in Dublin. **58,** 115A, 1999

High international normalized ratio (INR) is a potential problem in patients referred for percutaneous endoscopic gastrostomy. **58,** 116A, 1999

One years experience of a multidisciplinary percutaneous endoscopic gastrostomy (PEG) clinic. **58,** 116A, 1999

Feeding practices in special care baby units: a survey of units in the United Kingdom. **58,** 117A, 1999

Tunnelled central venous catheters: insertion best practised in radiology suite with screening facilities? **58,** 118A, 1999

Growth of paediatric and adult home enteral tube feeding between 1986 and 1998 in the Cambridge health district. **58,** 127A, 1999

Lack of effectiveness of short-term intravenous nutrition (IVN) in restoring plasma antioxidant status post surgery. **58,** 130A, 1999

Outcome of home enteral tube feeding in adults, in the Cambridge health district, between 1986 and 1998. **58,** 131A, 1999

Outcomes of percutaneous endoscopic gastrostomy tube insertion 1991–7. **58,** 138A, 1999

Home parenteral nutrition training: A comparative study of cost effectiveness and quality of life issues between hospital and community. **58,** 138A, 1999

Audit of General Practitioner's GP knowledge of and satisfaction with the service provided by the nutrition support team to patients at home receiving artificial nutrition. **58,** 141A, 1999

Changing feeding practices in Intensive care 1996–1998. **58,** 146A, 1999

Improved prescribing of parenteral nutrition following revision of standard available regimens. **58,** 145A, 1999

Nutritional therapy
Nutrition and lung health. **58,** 303, 1999

Obesity
Obesity: from molecules to man. **58,** 1, 1999

Eating habits and appetite control: a psychobiological perspective. **58,** 59, 1999

Influence of intense physical activity on energy balance and body fatness. **58,** 99, 1999

Childhood leukaemia: a model of pre-obesity. **58,** 277, 1999

New understanding in obesity research. **58,** 385, 1999

High-fat and low-fat (behavioural) phenotypes: biology or environment? **58,** 773, 1999

Effect of ephedrine, caffeine, and aspirin combinations on weight loss in obese women. **58,** 15A, 1999

Obesity management
Treatment of obesity: theory into practice. **58,** 53, 1999

Oestrogens
Phyto-oestrogens: a potential role in the prevention of CHD? **58,** 193, 1999

Old age
A possible role for vitamin C in age-related cataract. **58,** 295, 1999

Optimal diets
Animal v. plant foods in human diets and health: is the historical record unequivocal? **58,** 211, 1999

Optimistic bias
Social determinants of food choice. **58,** 807, 1999

Organ transplant recipients
Does exercise induce oxidative stress in endurance-trained kidney and heart transplant recipients? **58,** 169A, 1999

Organosulfur compounds
Inhibition of mutagen formation by organosulfur compounds. **58,** 43A, 1999

Overconsumption
New understanding in obesity research. **58,** 385, 1999

Overfeeding
Fasting leptin responses to increases in fat balance induced by 50% fat and carbohydrate overfeeding in lean and obese women. **58,** 24A, 1999

Oxidative damage
Determination of activity of antioxidants in human subjects. **58,** 1015, 1999

Oxidative stress
An overview of methods for assessment of free radical activity in biology. **58,** 1001, 1999

Analysis of cellular responses to free radicals: focus on exercise and skeletal muscle. **58,** 1025, 1999

Free radicals in skin and muscle: damaging agents or signals for adaptation? **58,** 673, 1999

Oxidant stress: the role of nutrients in cell–lipoprotein interactions. **58,** 559, 1999

Selenium and host defence towards viruses. **58,** 707, 1999

Palaeolithic diets
Animal v. plant foods in human diets and health: is the historical record unequivocal? **58,** 211, 1999

Palm oil
Use of red palm oil for promotion of maternal vitamin A status. **58,** 56A, 1999

Pantothenate status
Optimum nutrition: thiamin, biotin and pantothenate. **58,** 427, 1999

Parenteral nutrition
A double-blind, controlled trial of glutamine supplementation in parenteral nutrition. **58,** 113A, 1999

Energy prescribed and energy received during parenteral nutrition in children. **58,** 113A, 1999

Distress from hunger in patients receiving parenteral nutrition at home and hospital. **58,** 132A, 1999

The stability of vitamin E in parenteral nutrition (PN) mixtures during administration. **58,** 136A, 1999

Assessing the potential for changing the pharmacist's role in prescribing neonatal parenteral nutrition. **58,** 137A, 1999

The stability of Glutamine after addition to a 3-compartment TPN bag. **58,** 137A, 1999

Home parenteral nutrition training: A comparative study of cost effectiveness and quality of life issues between hospital and community. **58,** 138A, 1999

Improved prescribing of parenteral nutrition following revision of standard available regimens. **58,** 145A, 1999

Percutaneous endoscopic gastrostomy
High international normalized ratio (INR) is a potential problem in patients referred for percutaneous endoscopic gastrostomy. **58,** 116A, 1999

One years experience of a multidisciplinary percutaneous endoscopic gastrostomy (PEG) clinic. **58,** 116A, 1999

Health-related quality of life and nutritional outcomes after percutaneous endoscopic gastrostomy (PEG): A prospective study. **58,** 127A, 1999

Outcomes of percutaneous endoscopic gastrostomy tube insertion 1991–7. **58,** 138A, 1999

A cross-sectional study of nutritional outcomes after percutaneous endoscopic gastrostomy (PEG): results and problems of assessment. **58,** 141A, 1999

Continuous audit of percutaneous endoscopic gastrostomy for long-term enteral nutrition. **58,** 143A, 1999

Peroxisomes
Contribution of peroxisomes to fatty acid oxidation in tissues from preruminant calves: effects of the nature of dietary fatty acids. **58,** 106A, 1999

Phosphate metabolism
Introduction to in vivo ^{31}P magnetic resonance spectroscopy of (human) skeletal muscle. **58,** 861, 1999

Phosphorus
Optimal nutrition: calcium, magnesium and phosphorus. **58,** 477, 1999

The calcium and phosphorus intakes of Shenyang women in the north-east of the People's Republic of China. **58,** 50A, 1999

Effects of *Aspergillus fumigatus* phytase on phosphorus digestibility, phosphorus excretion, bone strength and performance in pigs. **58,** 100A, 1999

Physical activity
Childhood leukaemia: a model of pre-obesity. **58,** 277, 1999

New understanding in obesity research. **58,** 385, 1999

What processes are involved in the appetite response to moderate increases in exercise-induced energy expenditure? **58,** 107, 1999

The effect of inactivity on dietary intake and energy homeostasis. **58,** 115, 1999

Physical inactivity
The effect of inactivity on dietary intake and energy homeostasis. **58,** 115, 1999

Phytase
Effects of *Aspergillus fumigatus* phytase on phosphorus digestibility, phosphorus excretion, bone strength and performance in pigs. **58,** 100A, 1999

Phytochemicals
Optimal nutrition: fibre and phytochemicals. **58,** 415, 1999

Phyto-oestrogens
The bioavailability of non-nutrient plant factors: dietary flavonoids and phyto-oestrogens. **58,** 139, 1999

Phyto-oestrogens: a potential role in the prevention of CHD? **58,** 193, 1999

The effect of phyto-oestrogen-rich foods on urinary output of phyto-oestrogen metabolites: a pilot study. **58**, 42A, 1999

Pine seed oil
Effects of pine seed oil on hypercholesterolemic transgenic mice. **58**, 77A, 1999

Placenta
The influence of the maternal uterine immune response on placentation in human subjects. **58**, 69, 1999

The influence of maternal nutrient restriction in early to mid-pregnancy on placental and fetal development in sheep. **58**, 283, 1999

Plant-based diets
Animal v. plant foods in human diets and health: is the historical record unequivocal? **58**, 211, 1999

The nutritional value of plant-based diets in relation to human amino acid and protein requirements. **58**, 249, 1999

Plasma
The effects of rehydration beverage sodium concentration on restoration of fluid balance and plasma volume. **58**, 60A, 1999

Platelets
Oxidant stress: the role of nutrients in cell–lipoprotein interactions. **58**, 559, 1999

Poisonous plants
Conditioned food aversions: principles and practices, with special reference to social facilitation. **58**, 813, 1999

Polyamines
Polyamines in preterm human milk and infant formulas. **58**, 41A, 1999

Effects of changes in polyamine metabolism on DNA methylation during growth inhibition of human colonic cancer cells. **58**, 72A, 1999

Polyunsaturated fatty acids
Development of farmed fish: a nutritionally necessary alternative to meat. **58**, 377, 1999

Unsaturated fatty acids. **58**, 397, 1999

Targets and procedures for altering ruminant meat and milk lipids. **58**, 593, 1999

Selectivity of fatty acids on lipid metabolism and gene expression. **58**, 633, 1999

Post-exercise diet
Observation of intramyocellular lipids by means of ^{1}H magnetic resonance spectroscopy. **58**, 841, 1999

Post-ingestive feedback
Habitat selection according to the ability of animals to eat, digest and detoxify foods. **58**, 799, 1999

Postprandial chylomicron technique
Bioavailability of carotenoids in human subjects. **58**, 155, 1999

Postprandial lipaemia
Dietary carbohydrates and triacylglycerol metabolism. **58**, 201, 1999

Potentiation of postprandial lipaemia by ethanol. **58**, 122A, 1999

Postprandial metabolism
Inappropriate nocturnal postprandial responses amongst shift workers. **58**, 34A, 1999

Within-individual variability in postprandial lipaemia following oral ingestion of [1,1,1-^{13}C]tripalmitin in healthy young subjects. **58**, 35A, 1999

Influence of sucrose or fat on postprandial ^{15}N-labelled milk protein deamination in fasting subjects. **58**, 82A, 1999

Influence of meal time and stress induced by mental load on postprandial energy expenditure. **58**, 87A, 1999

Postprandial lipaemia after isoenergetic 3 d high-carbohydrate and high-fat diets. **58**, 132A, 1999

Lipoprotein atherogenicity: an overview of current mechanisms. **58**, 163, 1999

Potassium
Vasoactive substances in the interstitium of contracting skeletal muscle examined by microdialysis. **58**, 925, 1999

Human muscle interstitial K^+ measured by microdialysis during rest and exercise. **58**, 175A, 1999

Pregnancy
Optimal intakes of protein in the human diet. **58**, 403, 1999

Effect of dietary fatty acids on plasma and adipose tissue fatty acid proportions during pregnancy in the sow. **58**, 31A, 1999

Women's perceptions of diet, folic acid and pregnancy. **58**, 53A, 1999

Dietary restraint and weight gain during pregnancy. **58**, 54A, 1999

Whole-body protein turnover in pregnant English women of different body mass index. **58**, 55A, 1999

Prescribing patterns
An audit of prescribing patterns of oral nutritional supplements in primary care. **58**, 142A, 1999

Pressure sores
Dietary intake of adults, with and without pressure sores, treated by community nursing staff. **58**, 140A, 1999

Preterm infants
Food specific immunoglobulin (IgG) levels and allergic outcome in preterm infants. **58**, 56A, 1999

Prickly pear
In vitro digestibility of prickly pear protein. **58**, 86A, 1999

Composition and nutritional prospects of prickly pear fruit. **58**, 87A, 1999

Procyanidin
Inhibitory effect of procyanidin-containing extracts on LDL oxidation *in vitro*. **58**, 91A, 1999

Protein
Effect of habitual dietary protein intake on appetite and satiety. **58**, 17A, 1999

Contribution of dietary glucose to milk protein synthesis in ruminants. **58**, 90A, 1999

Global analysis of two-dimensional protein patterns of the lactic acid bacterium *Streptococcus thermophilus*. **58**, 96A, 1999

The effect of nitrogen form on the diet selection of sheep which have been deprived of protein in different ways. **58**, 158A, 1999

Protein metabolism
An introduction to the use of tracers in nutrition and metabolism. **58,** 935, 1999

Whole-body protein turnover in pregnant English women of different body mass index. **58,** 55A, 1999

Influence of sucrose or fat on postprandial ^{15}N-labelled milk protein deamination in fasting subjects. **58,** 82A, 1999

Postprandial porto-arterial kinetics of ^{15}N, amino nitrogen, glucose and galactose in the growing pig after ingestion of milk, yoghurt and sterilized yoghurt. **58,** 99A, 1999

Protein requirements
Optimal intakes of protein in the human diet. **58,** 403, 1999

Protein restriction
The impact of dietary protein restriction on insulin secretion and action. **58,** 647, 1999

Protein scoring
The nutritional value of plant-based diets in relation to human amino acid and protein requirements. **58,** 249, 1999

Protein synthesis
Gastrin-stimulated pancreatic protein synthesis and activation of phosphatidyl inositol 3 (PI-3) kinase and p70-S6 kinase systems by gastrin via pancreatic cholecystokinin B/gastrin receptors. **58,** 79A, 1999

Treatment with ornithine aspartate (Hepa-Merz) restores muscle protein synthesis responsiveness to feeding in patients with liver cirrhosis. **58,** 121A, 1999

Protein turnover
Tracers to investigate protein and amino acid metabolism in human subjects. **58,** 987, 1999

Public health
Food aid in emergencies: a case for wheat? **58,** 355, 1999

New understanding in obesity research. **58,** 385, 1999

Pulmonary cachexia syndrome
The pulmonary cachexia syndrome: aspects of energy balance. **58,** 321, 1999

Pyridoxine status
Current knowledge concerning optimum nutritional status of riboflavin, niacin and pyridoxine. **58,** 435, 1999

Rainbow trout
Effects of increasing dietary lipid levels on lipogenic enzyme activities in liver of rainbow trout (*Oncorhynchus mykiss*). **58,** 83A, 1999

Effect of dietary energy sources and rearing temperature on lipogenesis in rainbow trout. **58,** 103A, 1999

Reactive oxygen species
Analysis of cellular responses to free radicals: focus on exercise and skeletal muscle. **58,** 1025, 1999

Refugees
Nutritional status and functional ability of older refugees. **58,** 3A, 1999

Rehydration
Influence of an electrolyte beverage on short-term rehydration following a prolonged field exercise. **58,** 60A, 1999

The effects of rehydration beverage sodium concentration on restoration of fluid balance and plasma volume. **58,** 60A, 1999

Renal function
Optimal intakes of protein in the human diet. **58,** 403, 1999

Reproduction
Comparison of dietary restriction alone with leptin treatment on spermatogenesis in male *ob/ob* mice. **58,** 68A, 1999

Restoration of full reproductive capacity in male and female *ob/ob* mice by chronic leptin administration. **58,** 68A, 1999

Feeding pattern of sucking rabbits. Effects of litter size. **58,** 82A, 1999

Respiratory exchange ratio
Skeletal muscle substrate metabolism during exercise: methodological considerations. **58,** 899, 1999

Retinoic acid
Optimal nutrition: vitamin A and the carotenoids. **58,** 449, 1999

A genetic dissection of the retinoid signalling pathway in the mouse. **58,** 609, 1999

Retinoic acid receptors
A genetic dissection of the retinoid signalling pathway in the mouse. **58,** 609, 1999

Retinol
Optimal nutrition: vitamin A and the carotenoids. **58,** 449, 1999

Riboflavin
Luminal riboflavin is essential for normal morphological development of the gastrointestinal tract. **58,** 55A, 1999

Riboflavin status
Current knowledge concerning optimum nutritional status of riboflavin, niacin and pyridoxine. **58,** 435, 1999

Rudolf Schoenheimer
Isotopes in nutrition research. **58,** 15, 1999

Ruminants
The effect of nutrients on feed intake in ruminants. **58,** 523, 1999

Influence of diet type, potassium and animal species on the absorption of magnesium by ruminants. **58,** 31A, 1999

Ruminant nutrition
Contribution of dietary glucose to milk protein synthesis in ruminants. **58,** 90A, 1999

Saliva
Investigation of salivary hormone secretion following food intake in man. **58,** 20A, 1999

Satiety
Eating habits and appetite control: a psychobiological perspective. **58,** 59, 1999

Saturated fatty acids
Increasing stearoyl Co-A desaturase activity; a potential method to reduce the saturated fatty acid content of lamb meat. **58,** 29A, 1999

Schoolchildren
Nutritional knowledge and attitudes to healthy eating amongst Surrey schoolchildren: preliminary data. **58,** 10A, 1999

Assessment of goitre prevalence and nutritional status of schoolchildren in the mountainous region of Surakarta, Indonesia. **58,** 58A, 1999

Season
Effects of extreme environments on food intake in human subjects. **58,** 791, 1999

Secondary plant metabolites
Optimal nutrition: fibre and phytochemicals. **58,** 415, 1999

Selenium
Functional indicators of iodine and selenium status. **58,** 507, 1999
Selenium and host defence towards viruses. **58,** 707, 1999

Selenoproteins
Functional indicators of iodine and selenium status. **58,** 507, 1999

Sensory properties of foods
Functionality of nutrients and thermal treatments of food. **58,** 579, 1999

Sepsis
The relative importance of endoluminal and extraluminal colonization in the pathogenesis of catheter related sepsis in the central venous catheter. **58,** 118A, 1999
Is the impact of a nutrition support team on catheter-related sepsis sustained in the long term? **58,** 139A, 1999
Increased *in vivo* liver nitric oxide production during endotoxin challenge in pigs. **58,** 167A, 1999
In vivo whole-body nitric oxide synthesis, determined by the conversion of [$^{15}N_2$]arginine to [^{15}N]citrulline, is not increased in acute endotoxin-treated mice. **58,** 168A, 1999

Serum transferrin receptor
Defining optimal body iron. **58,** 489, 1999

Sham feeding
The effect of chewing nutritive and non-nutritive material (modified sham feeding model) on subsequent appetite sensations and food intake. **58,** 20A, 1999
The value of modified sham feeding as a model to study pre-absorptive changes in appetite sensations. **58,** 126A, 1999

Shift workers
Inappropriate nocturnal postprandial responses amongst shift workers. **58,** 34A, 1999

Short-chain fatty acids
Luminal short chain fatty acid concentration and apoptosis in colonic crypts from rats exposed to dimethyl hydrazine (DMH). **58,** 14A, 1999

Skeletal muscle
Free radicals in skin and muscle: damaging agents or signals for adaptation? **58,** 673, 1999
Glutathione status in critically-ill patients: possibility of modulation by antioxidants. **58,** 677, 1999
Introduction to in vivo ^{31}P magnetic resonance spectroscopy of (human) skeletal muscle. **58,** 861, 1999
Micordialysis: use in human exercise studies. **58,** 913, 1999
Microdialysis of skeletal muscle at rest. **58,** 919, 1999
Tracers to investigate protein and amino acid metabolism in human subjects. **58,** 987, 1999
Analysis of cellular responses to free radicals: focus on exercise and skeletal muscle. **58,** 1025, 1999

Skin
Free radicals in skin and muscle: damaging agents or signals for adaptation? **58,** 673, 1999

Small bowel transplantation
Monitoring changes in allograft function after small bowel transplantation in children. **58,** 117A, 1999

Small dense LDL
Lipoprotein atherogenicity: an overview of current mechanisms. **58,** 163, 1999

Smoking
Relationship between smoking, antioxidant intake and status indices in older people. **58,** 5A, 1999

Social class
Socioeconomic differences in the dietary trends in Karachi. **58,** 153A, 1999
Social class differences in foods eaten by a national sample of 4-year-old children in 1950. **58,** 156A, 1999

Social facilitation
Conditioned food aversions: principles and practices, with special reference to social facilitation. **58,** 813, 1999

Social psychological attitudes
Social determinants of food choice. **58,** 807, 1999

Sodium
Dietary influences on chronic obstructive lung disease and asthma: a review of the epidemiological evidence. **58,** 309, 1999

Sorghum
Nutritional value of a sorghum-based food complemented with soyabean proteins for African people. **58,** 98A, 1999

Soyabean
China: the soyabean–pork dilemma **58,** 345, 1999
Phyto-oestrogens: a potential role in the prevention of CHD? **58,** 193, 1999
Duodenal passage of α-conglycinin from soyabean in the preruminant calf. **58,** 78A, 1999
Nutritional value of a sorghum-based food complemented with soyabean proteins for African people. **58,** 98A, 1999

Spinal cord lesion
The effect of drink composition on deuterium accumulation in able-bodied and spinal-cord-injured men. **58,** 168A, 1999

Stable isotopes
Isotopes in nutrition research. **58,** 15, 1999
An introduction to the use of tracers in nutrition and metabolism. **58,** 935, 1999
Use of stable isotopes to study carbohydrate and fat metabolism at the whole-body level. **58,** 953, 1999
Quantifying the contribution of gluconeogenesis to glucose production in fasted human subjects using stable isotopes. **58,** 963, 1999
Glycerol production and utilization measured using stable isotopes. **58,** 973, 1999

Stable-isotope studies
Impact of endogenous ^{13}C-labelling of a foodstuff on $^{13}CO_2$ output during stable-isotope studies of postprandial fat metabolism. **58,** 71A, 1999

Sugars
Effects of different sugars on mood and cognitive performance. **58,** 19A, 1999

Supplementation
Vitamin E transfer from the feed into the egg yolk: effect of dietary supplementation. **58,** 29A, 1999

Carotenoid distribution in tissues of the laying hen depends on dietary supplementation. **58,** 30A, 1999

Taurine
Immunonutrition and surgical practice. **58,** 831, 1999

Temperature regulation
Thermoneutral temperature of Aston strain *ob/ob* mice acclimated to warm (30°) *v.* cold (20°) environments. **58,** 76A, 1999

Tetrahydrofolate
Folate and vitamin B_{12}. **58,** 441, 1999

Thermal treatment
Functionality of nutrients and thermal treatments of food. **58,** 579, 1999

Thermogenesis
Thermogenic effect of slight hyperglycaemia during a lipid infusion. **58,** 73A, 1999

Splanchnic thermogenesis during a hyperinsulinaemic euglycaemic clamp. **58,** 173A, 1999

Thermo-selection
Preparing for inactivity: how insectivorous bats deposit a fat store for hibernation. **58,** 123, 1999

Thiamin status
Optimum nutrition: thiamin, biotin and pantothenate. **58,** 427, 1999

'Thrifty phenotype' hypothesis
The long-term consequences of intra-uterine protein malnutrition for glucose metabolism. **58,** 615, 1999

Thyroid
Thyroid status affects the cellular action of vitamin A in adult mouse brain. **58,** 95A, 1999

Thyroid hormones
Functional indicators of iodine and selenium status. **58,** 507, 1999

Tissue metabolism
Arterio–venous differences to study macronutrient metabolism: introduction and overview. **58,** 871, 1999

Torpor
Preparing for inactivity: how insectivorous bats deposit a fat store for hibernation. **58,** 123, 1999

Trace elements
Nutrition and immunology: from the clinic to cellular biology and back again. **58,** 681, 1999

Tracer balance methods
Tracers to investigate protein and amino acid metabolism in human subjects. **58,** 987, 1999

Training
Exercise and immune function: effect of ageing and nutrition. **58,** 733, 1999

Transketolase activation
Optimum nutrition: thiamin, biotin and pantothenate. **58,** 427, 1999

Triacylglycerols
Lipoprotein atherogenicity: an overview of current mechanisms. **58,** 163, 1999

Dietary carbohydrates and triacylglycerol metabolism. **58,** 201, 1999

Unsaturated fatty acids. **58,** 397, 1999

Present and future studies on lipogenesis in animals and human subjects. **58,** 541, 1999

Skeletal muscle substrate metabolism during exercise: methodological considerations. **58,** 899, 1999

Trophoblast
The influence of the maternal uterine immune response on placentation in human subjects. **58,** 69, 1999

Tumour necrosis factor-α
Production of tumour necrosis factor-α by blood mononuclear cells increases with age and with BMI in healthy women. **58,** 129A, 1999

Tumour suppressor protein p53
Metal ions as regulators of the conformation and function of the tumour suppressor protein p53: implications for carcinogenesis. **58,** 565, 1999

Undernutrition
Pre-operative nutritional assessment. **58,** 821, 1999

Vascular smooth muscle
Oxidant stress: the role of nutrients in cell–lipoprotein interactions. **58,** 559, 1999

Vegan
Health benefits of a vegetarian diet. **58,** 271, 1999

Vegetarians
The nutritional adequacy of plant-based diets. **58,** 265, 1999

Health benefits of a vegetarian diet. **58,** 271, 1999

The effect of self-selected dietary supplements on micronutrient intakes in vegans. **58,** 35A, 1999

Iodine intake and iodine status in vegans. **58,** 36A, 1999

Energy distribution and non-starch polysaccharide intake in vegans. **58,** 36A, 1999

Variation in dietary fibre intake and bowel function in omnivores, vegetarians and vegans. **58,** 37A, 1999

Changes in nutrient intake after changing to a self-selected vegetarian diet for 18 months. **58,** 39A, 1999

Low meat eaters in north Glasgow: who are they and what else do they eat? **58,** 39A, 1999

Vegetarian diet
Vegetarian meals which are proposed in collective catering may contribute to the recommended dietary allowances. **58,** 88A, 1999

Viral mutation
Selenium and host defence towards viruses. **58,** 707, 1999

Vitamins
Antioxidants and lipoprotein metabolism. **58,** 663, 1999

Vitamin A
Bioavailability of carotenoids in human subjects. **58,** 155, 1999

The effect of vitamin A on epithelial integrity. **58,** 289, 1999

Optimal nutrition: vitamin A and the carotenoids. **58,** 449, 1999

Vitamin A and immunity to viral, bacterial and protozoan infections. **58,** 719, 1999

Use of red palm oil for promotion of maternal vitamin A status. **58,** 56A, 1999

Assessment of dietary intake of vitamin A and iron by lactating Indian women. **58,** 57A, 1999

The effect of breast-feeding on vitamin A status of infants of human immunodeficiency virus positive (HIV+) women with or without vitamin A supplementation. **58,** 57A, 1999

Thyroid status affects the cellular action of vitamin A in adult mouse brain. **58,** 95A, 1999

Vitamin B_{12}

The nutritional adequacy of plant-based diets. **58,** 265, 1999

Folate and vitamin B_{12}. **58,** 441, 1999

Vitamin C

Effects of dietary antioxidants on the immune function of middle-aged adults. **58,** 79, 1999

A possible role for vitamin C in age-related cataract. **58,** 295, 1999

Vitamins and lung cancer. **58,** 329, 1999

Vitamin C: prospective functional markers for defining optimal nutritional status. **58,** 469, 1999

The effects of vitamin C supplementation on dynamic lung function: a double-blind cross-over trial. **58,** 44A, 1999

Influence of maternal vitamin C intake on collagen concentration during fetal development in the guinea-pig. **58,** 54A, 1999

Collagen crosslink ratios in bone and urine of guinea-pigs fed with graded intakes of vitamin C. **58,** 63A, 1999

Vitamin D

The nutritional adequacy of plant-based diets. **58,** 265, 1999

Vitamin E

Effects of dietary antioxidants on the immune function of middle-aged adults. **58,** 79, 1999

Vitamins and lung cancer. **58,** 329, 1999

Optimal nutrition: vitamin E. **58,** 459, 1999

Vitamin E and infectious diseases in the aged. **58,** 697, 1999

Vitamin E transfer from the feed into the egg yolk: effect of dietary supplementation. **58,** 29A, 1999

Oxidative stress and vitamin E status in experimental diabetes. **58,** 81A, 1999

Plasma vitamin E and urate levels in cystic fibrosis liver disease. **58,** 135A, 1999

The stability of vitamin E in parenteral nutrition (PN) mixtures during administration. **58,** 136A, 1999

Volatile fatty acids

The effect of nutrients on feed intake in ruminants. **58,** 523, 1999

Wasting

Nutrition and immune function in human immunodeficiency virus infection. **58,** 743, 1999

Weight loss

Effect of ephedrine, caffeine, and aspirin combinations on weight loss in obese women. **58,** 15A, 1999

Zinc

The regulation of mineral absorption in the gastrointestinal tract. **58,** 147, 1999

Considerations for determining 'optimal nutrition' for copper, zinc, manganese and molybdenum. **58,** 497, 1999

Metal ions as regulators of the conformation and function of the tumour suppressor protein p53: implications for carcinogenesis. **58,** 565, 1999
